This Statement of Additional Information (“SAI”) is meant to be read in conjunction with the prospectus for the WSTCM Sector Select Risk - Managed Fund (the “Sector Select RM Fund”) and the WSTCM Credit Select Risk - Managed Fund (the “Credit Select RM Fund”, together with the Sector Select RM Fund, the “Funds”) dated the same date as this SAI, which incorporates this SAI by reference in its entirety (the “Prospectus”). Because this SAI is not itself a prospectus, no investment in shares of the Funds should be made solely upon the information contained herein. Copies of the Prospectus for the Funds may be obtained at no charge by writing or calling the Funds at the address or phone number shown above. Capitalized terms used but not defined herein have the same meanings as in the Prospectus.

OTHER INVESTMENT POLICIES

The WST Investment Trust (the “Trust”) was organized on June 27, 2013 as a Delaware statutory trust and is registered with the Securities and Exchange Commission (the “SEC”) as an open-end management investment company. The Sector Select RM Fund and the Credit Select RM Fund are each a separate non-diversified series of the Trust. Prior to December 31, 2016, the Sector Select RM Fund was named the WST Asset Manager – U.S. Equity Fund and the Credit Select RM Fund was named the WST Asset Manager – U.S. Bond Fund.

ADDITIONAL INFORMATION ON INVESTMENTS, STRATEGIES AND RISKS

Information contained in this SAI expands upon information contained in the Prospectus. All investments in securities and other financial instruments involve a risk of financial loss. No assurance can be given that the Funds’ investment programs will be successful. Investors should carefully review the descriptions of the Funds’ investments and associated risks described in the Prospectus and this SAI. No investment in shares of the Funds should be made without first reading the Prospectus. Attached to this SAI is Appendix A, which contains descriptions of the rating symbols used by nationally recognized statistical rating organizations for certain securities in which the Funds may invest.

GENERAL INVESTMENT RISKS. All investments in securities and other financial instruments involve a risk of financial loss. No assurance can be given that a Fund’s investment programs will be successful. Investors should carefully review the descriptions of each Fund’s investments and their risks in this SAI and the Prospectus.

EXCHANGE TRADED FUND AND INVESTMENTS IN OTHER INVESTMENT COMPANIES

Exchange Traded Funds (“ETFs”). As noted in the Prospectus, the Funds will invest primarily in ETFs. The shares of an ETF may be assembled in a block (typically 50,000 shares) known as a creation unit and redeemed in kind for a portfolio of the underlying securities (based on the ETF’s net asset value) together with a cash payment generally equal to accumulated dividends as of the date of redemption. Conversely, a creation unit may be purchased from the ETF by depositing a specified portfolio of the ETF’s underlying securities, as well as a cash payment generally equal to accumulated dividends of the securities (net of expenses) up to the time of deposit. The Funds do not intend to purchase and redeem creation units to take advantage of short-term arbitrage opportunities. However, each Fund may redeem creation units for the underlying securities (and any applicable cash), and may assemble a portfolio of the underlying securities and use it (and any required cash) to purchase creation units, if the Funds’ investment adviser, Wilbanks, Smith & Thomas Asset Management, LLC, d/b/a WST Capital Management (the “Advisor”), believes it is in the Fund’s interest to do so. A Fund’s ability to redeem creation units may be limited by the Investment Company Act of 1940, as amended (the “1940 Act”), which provides that the ETFs will not be obligated to redeem shares held by the Fund in an amount exceeding one percent of their total outstanding securities during any period of less than 30 days.

Shares representing fractional interests in these creation units are also listed for trading on national securities exchanges and can be purchased and sold in the secondary market like ordinary stocks in lots of any size at any time during the trading day. ETFs traded on national securities exchanges trade based on their market value.

There is a risk that the underlying ETFs in which a Fund invests may terminate due to extraordinary events that may cause any of the service providers to the ETFs, such as the trustee or sponsor, to close or otherwise fail to perform their obligations to the ETF. Also, because the ETFs in which the Funds intend to principally invest may be granted licenses by agreement to use various indices as a basis for determining their compositions and/or otherwise to use certain trade names, the ETFs may terminate if such license agreements are terminated. In addition, an ETF may terminate if its net assets fall below a certain amount. Although the Funds believe that, in the event of the termination of an underlying ETF, it will be able to invest instead in shares of an alternate ETF tracking the same market index or another market index within the same general market, there is no guarantee that shares of an alternate ETF would be available for investment at that time.

An investment in an ETF generally presents the same primary risks as an investment in a conventional fund (i.e., one that is not exchange traded), including the risk that the general level of security prices, or that the prices of securities within a particular sector, may increase or decline, thereby affecting the value of the shares of an ETF. In addition,

ETFs are subject to the following risks that do not apply to a conventional fund: (1) the market price of an ETF's shares may trade at a discount to its net asset value; (2) an active trading market for an ETF's shares may not develop or be maintained; (3) trading of an ETF's shares may be halted if the listing exchange deems such action appropriate; and (4) the shares may be delisted from the exchange on which they trade, or activation of "circuit breakers" (which are tied to large decreases in stock prices) may halt trading temporarily. ETFs are also subject to the risks of the underlying securities or sectors the ETF is designed to track.

ETFs may be actively managed or indexed-based. Actively managed ETFs are subject to management risk and may not achieve their objective if the ETF's manager expectations regarding particular securities or markets are not met. An index based ETF's objective is to track the performance of a specific index. Index based ETFs generally invest in a securities portfolio that includes substantially all of the securities (in substantially the same amount) included in the applicable index. Since passively managed ETFs are designed to track an index, securities may be purchased, retained and sold when an actively managed ETF would not do so. As a result, passively managed ETFs can expect greater risk of loss (and a corresponding prospect of gain) from changes in the value of the securities that are heavily weighted in the index than would be the case if the ETF were not fully invested in such securities.

Debt Securities ETFs. There are risks associated with the potential investment of a Fund's assets in debt securities ETFs, which may include credit risk, interest rate risk and maturity risk as described below:

- **Credit Risk.** Credit risk is the risk that the issuer or guarantor of a fixed income security or counterparty to a transaction involving one or more bonds in an ETF's portfolio will be unable or unwilling to make timely principal and/or interest payments, or otherwise will be unable or unwilling to honor its financial obligations. If the issuer, guarantor, or counterparty fails to pay interest, an ETF's income may be reduced. If the issuer, guarantor, or counterparty fails to repay principal, the value of that security and of the particular ETF's shares may be reduced. ETFs may be subject to credit risk to the extent that they invest in fixed income securities that involve a promise by a third party to honor an obligation with respect to the fixed income security. Securities rated BBB by S&P Global Ratings ("S&P") or Fitch Ratings, Inc. ("Fitch") or Baa by Moody's Investors Service, Inc. ("Moody's") are considered investment-grade securities, but are somewhat riskier than more highly-rated investment-grade obligations (those rated A or better) because they are regarded as having only an adequate capacity to pay principal and interest, are considered to lack outstanding investment characteristics, and may be speculative. Such investment-grade securities will be subject to higher credit risk and may be subject to greater fluctuations in value than higher-rated securities. Credit risk is particularly significant for investments in "junk bonds" or lower than investment-grade securities.
- **Interest Rate Risk.** The price of a bond or a fixed income security is dependent upon interest rates. Therefore, the share price and total return of an ETF, when investing a significant portion of its assets in bonds or fixed income securities, will vary in response to changes in interest rates. There is the possibility that the value of an ETF's investment in bonds or fixed income securities may fall because bonds or fixed income securities generally fall in value when interest rates rise. The longer the term of a bond or fixed income instrument, the more sensitive it will be to fluctuations in value from interest rate changes. Changes in interest rates may have a more pronounced effect if the ETF holds a significant portion of its assets in fixed income securities with long-term maturities. In addition, ETFs that hold assets in fixed income securities may be subject to a greater risk of rising interest rates due to the current period of historically low interest rates and the likelihood of a general rise in interest rates.

In the case of mortgage-backed securities, rising interest rates tend to extend the term to maturity of the securities, making them even more susceptible to interest rate changes. When interest rates drop, not only can the value of fixed income securities drop, but also the yield can drop, particularly where the yield is tied to changes in interest rates, such as adjustable mortgages. Also when interest rates drop, the holdings of mortgage-backed securities by an ETF can reduce returns if the owners of the underlying mortgages pay off their mortgages sooner than expected since a Fund's prepaid must be reinvested at lower prevailing interest rates. This is known as prepayment risk. When interest rates rise, the holdings of mortgage-backed securities by an ETF can reduce returns if the owners of the underlying mortgages pay off their mortgages later than anticipated. This is known as extension risk.

- **Maturity Risk.** Maturity risk is another factor that can affect the value of an ETF's fixed income holdings. Certain ETFs may not have a limitation policy regarding the length of maturity for their fixed income holdings. In general, fixed income obligations with longer maturities have higher yields and a greater sensitivity to changes in interest rates. Conversely, fixed income obligations with shorter maturities generally have lower yields but less sensitivity to changes in interest rates.

Other Investment Companies. As noted in the Prospectus, each Fund is a "fund of funds." The term "fund of funds" is typically used to describe investment companies, such as the Funds, whose principal investment strategy involves investing in other investment companies (ETFs or other investment companies). Under the 1940 Act, a Fund may not acquire shares of another investment company if, immediately after such acquisition, the Fund and its affiliated persons would hold more than 3% of the ETF's or investment company's total outstanding stock ("3% Limitation"). Accordingly, each Fund is subject to the 3% Limitation unless (i) the ETF or the Fund has received an order for exemptive relief from the 3% Limitation from the SEC that is applicable to the Fund; and (ii) the ETF and the Fund take appropriate steps to comply with any conditions in such order. The SEC has issued such exemptive orders to numerous ETFs and their investment advisers, which permit investment companies, including the Funds, to invest in such ETFs ("Exempted ETFs") beyond the 3% Limitation, subject to certain terms and conditions, including that such investment companies enter into an agreement with the Exempted ETF. Each Fund expects to enter into such agreements with a number of Exempted ETFs so that the Fund will be permitted to invest in such Exempted ETFs in excess of the 3% Limitation. To the extent other ETFs obtain similar exemptive relief from the SEC, the Funds may seek to qualify to invest in such other ETFs in excess of the 3% Limitation.

To the extent the 3% Limitation applies to certain ETFs, that limitation may prevent the Funds from allocating their investments in the manner that the Advisor considers optimal, or cause the Advisor to select a similar basket of stocks (pre-selected groups of securities related by index or sector made available through certain brokers at a discount brokerage rate) ("Stock Baskets") or a similar index-based mutual fund or other investment company (collectively, "Indexed Investments") as an alternative. The Funds may also invest in Indexed Investments when the Advisor believes they represent more attractive opportunities than similar ETFs. The Funds' investments in other investment companies will be subject to the same 3% Limitation described above.

Under the 1940 Act, to the extent that the Funds rely upon Section 12(d)(1)(F) in purchasing securities issued by another investment company, the Funds must either seek instructions from its shareholders with regard to the voting of all proxies with respect to its investment in such securities (ETFs and other investment companies) and vote such proxies only in accordance with the instructions, or vote the shares held by it in the same proportion as the vote of all other holders of the securities. In the event that there is a vote of ETF or other investment company shares held by the Funds, the Funds intend to vote such shares in the same proportion as the vote of all other holders of such securities.

EQUITY SECURITIES. The Sector Select RM Fund may invest in equity securities, both directly (including, without limitation, investments in Stock Baskets) and indirectly through the Fund's investment in shares of ETFs and other investment companies. The Credit Select RM Fund does not intend to invest directly in equity securities; however, the Fund may invest indirectly in equity securities through the Fund's investment in shares of ETFs and other investment companies. Such equity investments may include common stocks traded on domestic or foreign securities exchanges or on the over-the-counter market. In addition to common stocks, such investments may also include preferred stocks, convertible preferred stocks, and convertible bonds. Prices of equity securities in which the Funds invest may fluctuate in response to many factors, including, but not limited to, the activities of the individual companies whose securities a Fund owns, general market and economic conditions, interest rates, and specific industry changes. Such price fluctuations subject the Funds to potential losses. In addition, regardless of any one company's particular prospects, a declining stock market may produce a decline in prices for all equity securities, which could also result in losses for the Funds. Market declines may continue for an indefinite period of time, and investors should understand that during temporary or extended bear markets, the value of equity securities, including securities held by the Funds, will decline.

Investments in ETFs that invest in equity securities and similar securities involve certain inherent risks generally associated with investments in a broadly-based portfolio of stocks including: (1) risks that the general level of stock prices may decline, thereby adversely affecting the value of each unit of the ETF or other security; (2) an ETF may not fully replicate the performance of its benchmark index because of the temporary unavailability of certain index securities in the secondary market or discrepancies between the ETF and the index with respect to the weighting of securities or number of stocks held; (3) an ETF may also be adversely affected by the performance of the specific index, market sector or group of industries on

which it is based; and (4) an ETF may not track an index as well as a traditional index mutual fund because ETFs are valued by the market and, therefore, there may be a difference between the market value and the ETF's net asset value.

FOREIGN SECURITIES. The Funds may invest directly or indirectly in securities issued by foreign governments or foreign corporations, either directly or indirectly through ETFs or derivative transactions (e.g., foreign currency futures). Foreign securities, in addition to securities issued by United States ("U.S.") entities with substantial foreign operations, involve special risks, including those set forth below, which are not typically associated with investing in U.S. securities. Issuers of foreign securities are not generally subject to uniform accounting, auditing, and financial reporting standards comparable to those applicable to domestic companies. Additionally, many foreign stock markets, while growing in volume of trading activity, have substantially less volume than the New York Stock Exchange, and securities of some foreign companies are less liquid and more volatile than securities of domestic companies. Similarly, volume and liquidity in most foreign bond markets are less than the volume and liquidity in the U.S. and, at times, volatility of price can be greater than in the U.S. Further, foreign markets have different clearance, settlement, registration, and communication procedures and in certain markets there have been times when settlements have been unable to keep pace with the volume of securities transactions making it difficult to conduct such transactions. Delays in such procedures could result in temporary periods when assets are uninvested and no return is earned on them. The inability of an investor to make intended security purchases due to such problems could cause the investor to miss attractive investment opportunities.

Payment for securities without delivery may be required in certain foreign markets and, when participating in new issues, some foreign countries require payment to be made in advance of issuance (at the time of issuance, the market value of the security may be more or less than the purchase price). Some foreign markets also have compulsory depositories (i.e., an investor does not have a choice as to where the securities are held). Fixed commissions on some foreign stock exchanges are generally higher than negotiated commissions on U.S. exchanges. Further, an investor may encounter difficulties or be unable to pursue legal remedies and obtain judgments in foreign courts. There is generally less government supervision and regulation of business and industry practices, stock exchanges, brokers, and listed companies than in the U.S. It may be more difficult for an investor's agents to keep currently informed about corporate actions such as stock dividends or other matters that may affect the prices of portfolio securities. Communications between the U.S. and foreign countries may be less reliable than within the U.S., thus increasing the risk of delays or loss of certificates for portfolio securities. In addition, with respect to certain foreign countries, there is the possibility of nationalization, expropriation, the imposition of additional withholding or confiscatory taxes, political, social, or economic instability, diplomatic developments that could affect investments in those countries, or other unforeseen actions by regulatory bodies (such as changes to settlement or custody procedures).

The risks of foreign investing may be magnified for investments in emerging markets, which may have relatively unstable governments, economies based on only a few industries, and securities markets that trade a small number of securities.

FOREIGN DEBT SECURITIES. The Credit Select RM Fund may invest directly or indirectly in non-U.S. based debt securities, including foreign currency-denominated corporate and foreign government notes and bonds. Investing in foreign debt securities has the same risks as investing in foreign securities generally. In addition, foreign corporate bonds are subject to the risks that foreign companies may not be subject to uniform audit, financial reporting or disclosure standards, practices or requirements comparable to those found in the U.S., which may make it more difficult to evaluate the business and/or financial position of the issuer and the value of the bond. Foreign government bonds are also subject to the risks that governmental issuers of debt securities may be unwilling to pay interest and repay principal when due or may require that conditions for payment be renegotiated.

SOVEREIGN DEBT. The Credit Select RM Fund may invest directly or indirectly in sovereign debt securities issued or guaranteed by foreign governmental entities. In addition to the risks associated generally with debt securities and foreign debt securities, sovereign debt securities are subject to the risk that a governmental entity may delay or refuse to pay interest or repay principal on its sovereign debt. There may be limited or no legal process for collecting sovereign debts that a government does not pay nor are there bankruptcy proceeding through which all or part of the sovereign debt that a governmental entity has not repaid may be collected.

INVESTMENTS IN EMERGING MARKETS. The Credit Select RM Fund may invest directly or indirectly in emerging market debt securities. An "emerging market" is any country that the World Bank, the International Finance

Corporation or the United Nations or its authorities has determined to have a low or middle income economy. Emerging market countries may include, among others, countries in Asia, Latin, Central and South America, Eastern Europe, the Middle East and Africa. In addition to the general risk of investing in foreign securities and foreign debt securities described above, investing in emerging markets can involve greater and more unique risks than those associated with investing in more developed markets. The securities markets of emerging countries are generally small, less developed, less liquid, and more volatile than securities markets of the U.S. and other developed markets. The risks of investing in emerging markets include greater social, political and economic uncertainties. Emerging market economics are often dependent upon a few commodities or natural resources that may be significantly adversely affected by volatile price movements against those commodities or natural resources. Emerging market countries may experience high levels of inflation and currency devaluation and have fewer potential buyers for investments. The securities markets and legal systems in emerging market countries may only be in a developmental stage and may provide few, or none, of the advantages and protections of markets or legal systems in more developed countries. Some of these countries may have in the past failed to recognize private property rights and have at times nationalized or expropriated the assets of private companies. Additionally, if settlements do not keep pace with the volume of securities transactions, they may be delayed, potentially causing the Credit Select RM Fund's assets to be uninvested, the Fund to miss investment opportunities and potential returns, and the Fund to be unable to sell an investment. As a result of these various risks, investments in emerging markets are considered to be speculative and may be highly volatile.

FOREIGN CURRENCY. The Funds may invest directly or indirectly in foreign currency or in securities that track the performance of a foreign currency against another currency, whether the U.S. dollar or another foreign currency. As a result, the value of a Fund's assets as measured in U.S. dollars may be affected favorably or unfavorably by changes in currency exchange rates and exchange control regulations. Also, a Fund may incur costs in connection with conversions between various currencies. Currency exchange rates may fluctuate significantly over short periods of time causing a Fund's NAV (Net Asset Value) to fluctuate. Currency exchange rates are generally determined by the forces of supply and demand in the foreign exchange markets, actual or anticipated changes in interest rates, and other complex factors. Currency exchange rates also can be affected by the intervention of U.S. or foreign governments or central banks, or the failure to intervene, or by currency controls or political developments. A Fund's exposure to foreign currencies subjects the Fund to constantly changing exchange rates and the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of short positions, that the U.S. dollar will decline in value relative to the currency being sold forward. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates and economic or political developments in the U.S. or abroad. As a result, a Fund's exposure to foreign currencies may reduce the returns of the Fund. Trading of foreign currencies also includes the risk of clearing and settling trades which, if prices are volatile, may be difficult.

CONVERTIBLE SECURITIES. In addition to common and preferred stocks, the Sector Select RM Fund may invest directly or indirectly in securities convertible into common stock if, for example, the Advisor believes that a company's convertible securities are undervalued in the market. Convertible securities eligible for purchase by the Sector Select RM Fund include convertible bonds, convertible preferred stocks, and warrants. A warrant is an instrument issued by a corporation that gives the holder the right to subscribe to a specific amount of the corporation's capital stock at a set price for a specified period of time. Warrants do not represent ownership of the securities, but only the right to buy the securities. The price of warrants do not necessarily move parallel to the prices of their underlying securities. Warrants may be considered speculative in that they have no voting rights, pay no dividends, and have no rights with respect to the assets of their issuing corporation. Warrant positions will not be used to increase the leverage of the Sector Select RM Fund; consequently, warrant positions are generally accompanied by cash positions equivalent to the required exercise amount. The Sector Select RM Fund's ability to invest in warrants may be limited by the Fund's investment restrictions.

REAL ESTATE SECURITIES. The Sector Select RM Fund will not invest directly in real estate, but may invest directly or indirectly in readily marketable securities issued by companies that invest in real estate or interests therein. The Sector Select RM Fund may also invest in readily marketable interests in real estate investment trusts ("REITs"). REITs are generally publicly traded on national stock exchanges and in the over-the-counter market and have varying degrees of liquidity. Investments in real estate securities are subject to risks inherent in the real estate market, including risks related to changes in interest rates, possible declines in the value of and demand for real estate, adverse general and local economic conditions, possible lack of availability of mortgage funds, overbuilding in a given market and environmental problems.

The Sector Select RM Fund may invest in global real estate companies outside the U.S. These companies include, but are not limited to, companies with similar characteristics to the REIT structure, in which revenue consists primarily of rent derived from owned, income producing real estate properties, dividend distributions as a percentage of taxable net income are high (generally greater than 80%), debt levels are generally conservative and income derived from development activities is generally limited.

CORPORATE AND MUNICIPAL FIXED INCOME SECURITIES The Funds may invest directly or indirectly in corporate or municipal fixed income securities. Corporate and municipal fixed income securities purchased by a Fund may be of any credit quality, maturity or yield. Accordingly, the Funds' fixed income securities may include "investment grade" securities (those rated at least Baa by Moody's, BBB by S&P or Fitch or, if not rated, of equivalent quality in the Advisor's opinion). In addition, the Funds' fixed income securities may include lower-rated fixed income securities including, without limitation, "junk" bonds whose ratings are below investment grade. Fixed income securities rated Baa by Moody's or BBB by S&P or Fitch may be considered speculative and are subject to risks of non-payment of interest and principal. Fixed income securities rated lower than Baa by Moody's or lower than BBB by S&P or Fitch are generally considered speculative and subject to significant risks of non-payment of interest and principal and greater market fluctuations than higher-rated fixed-income securities. Lower-rated fixed income securities are usually issued by companies without long track records of sales and earnings, or by companies with questionable credit strength. The retail secondary market for these "junk bonds" may be less liquid than that of higher-rated fixed income securities, and adverse conditions could make it difficult at times to sell certain securities or could result in lower prices than those used in calculating a Fund's net asset value. These risks can reduce the value of the Funds' shares and the income it earns. Descriptions of the quality ratings of Moody's, S&P and Fitch are included as Appendix A to this SAI. While the Advisor utilizes the ratings of various credit rating services as one factor in establishing creditworthiness, it relies primarily upon its own analysis of factors establishing creditworthiness.

The Funds may invest (directly or indirectly) in fixed income securities issued by foreign governments or foreign corporations, including in emerging markets. Risks related to foreign securities, including emerging markets, are described above under "Foreign Securities".

MONEY MARKET INSTRUMENTS. The Funds may invest directly and indirectly in money market instruments including U.S. Government obligations or corporate debt obligations (including those subject to repurchase agreements), provided that they are eligible for purchase by the Funds. Money market instruments also may include Banker's Acceptances and Certificates of Deposit of domestic branches of banks, Commercial Paper, and Variable Amount Demand Master Notes ("Master Notes"). **Banker's Acceptances** are time drafts drawn on and "accepted" by a bank. When a bank "accepts" such a time draft, it assumes liability for its payment. When a Fund acquires a Banker's Acceptance, the bank that "accepted" the time draft is liable for payment of interest and principal when due. The Banker's Acceptance carries the full faith and credit of such bank. A **Certificate of Deposit** ("CD") is an unsecured, interest bearing debt obligation of a bank. **Commercial Paper** is an unsecured, short-term debt obligation of a bank, corporation, or other borrower. Commercial Paper maturity generally ranges from two to 270 days and is usually sold on a discounted basis rather than as an interest-bearing instrument. The Funds will invest directly in Commercial Paper only if it is rated in one of the top two rating categories by Moody's, S&P or Fitch or, if not rated, is of equivalent quality in the Advisor's opinion. Commercial Paper may include Master Notes of the same quality. **Master Notes** are unsecured obligations that are redeemable upon demand of the holder and that permit the investment of fluctuating amounts at varying rates of interest. Master Notes will be acquired by the Funds only through the Master Note program of the Funds' custodian bank, acting as administrator thereof. The Advisor will monitor, on a continuous basis, the earnings power, cash flow, and other liquidity ratios of the issuer of a Master Note held by the Funds.

U.S. GOVERNMENT SECURITIES. The Funds may invest directly or indirectly in U.S. government securities such as U.S. Treasury notes, U.S. Treasury bonds, and U.S. Treasury bills, obligations guaranteed by the U.S. government such as Government National Mortgage Association ("GNMA") and the Overseas Private Investment Corporation ("OPIC"), as well as obligations of U.S. government authorities, agencies, and instrumentalities such as Federal National Mortgage Association ("FNMA"), Federal Home Loan Mortgage Corporation ("FHLMC"), Federal Housing Administration, Federal Farm Credit Bank ("FFCB"), Federal Home Loan Bank, Student Loan Marketing Association ("SLMA"), and The Tennessee Valley Authority. U.S. government securities may be acquired subject to repurchase agreements. While obligations of some U.S. government sponsored entities are supported by the full faith and credit of the U.S. government (e.g., GNMA and OPIC), several are supported by the right of the issuer to borrow from the U.S.

Government (e.g. FNMA and FHLMC), and still others are supported only by the credit of the issuer itself (e.g., SLMA and FFCB). No assurance can be given that the U.S. government will provide financial support to U.S. government agencies or instrumentalities that are not supported by the full faith and credit of the U.S. government, since it is not obligated to do so by law. The guarantee of the U.S. government does not extend to the yield or value of the Funds' shares.

ZERO COUPON SECURITIES. The Funds may directly or indirectly purchase zero coupon securities. Zero coupon securities do not pay interest or principal until final maturity, unlike fixed income securities that provide periodic payments of interest (referred to as a coupon payment). Zero coupon securities are bought at a price below the amount payable at maturity. The difference between the purchase price and the amount paid at maturity represents interest on the zero coupon security. One must wait until maturity to receive interest and principal, which increases the market and credit risks of a zero coupon security. A zero coupon step-up security converts to a coupon security before final maturity.

REPURCHASE AGREEMENTS. The Funds may invest directly or indirectly in repurchase agreements. A repurchase agreement is a short term investment in which the purchaser acquires ownership of a U.S. Government security and the seller agrees to repurchase the security at a future time at a set price, thereby determining the yield during the purchaser's holding period. Any repurchase transaction in which a Fund engages will require full collateralization of the seller's obligation during the entire term of the repurchase agreement. In the event of a bankruptcy or other default of the seller, a Fund could experience both delays in liquidating the underlying security and losses in value.

REVERSE REPURCHASE AGREEMENTS. The Funds may also engage in reverse repurchase agreements. Reverse repurchase agreements are repurchase agreements in which a Fund is the seller (rather than the buyer) of the securities, and agrees to repurchase them at an agreed upon time and price. A reverse repurchase agreement may be viewed as a type of borrowing by the Funds. Reverse repurchase agreements are subject to credit risks. In addition, reverse repurchase agreements create leverage risks because a Fund must repurchase the underlying security at a higher price, regardless of the market value of the security at the time of repurchase.

MORTGAGE-BACKED SECURITIES. The Credit Select RM Fund may invest directly or indirectly in mortgage-backed securities, which may or may not be issued or guaranteed by the U.S. Government, its agencies or instrumentalities. Mortgage-backed securities are interests in pools of residential or commercial mortgage loans, including mortgage loans made by savings and loan institutions, mortgage bankers, commercial banks and others. Pools of mortgage loans are assembled as securities for sale to investors by private entities or various governmental and government-related entities. The value of some mortgage-backed securities in which the Credit Select RM Fund may invest may be particularly sensitive to changes in prevailing interest rates, and, like other debt securities investments, the ability of the Fund to successfully utilize these instruments may depend in part upon the ability of the Advisor to forecast interest rates and other economic factors correctly. Prepayment risk is a major risk of mortgage-backed securities.

MORTGAGE PASS-THROUGH CERTIFICATES. The Credit Select RM Fund may invest directly or indirectly in obligations of GNMA, FNMA, and FHLMC which include direct pass through certificates representing undivided ownership interests in pools of mortgages. The Credit Select RM Fund may invest in such certificates, which are guaranteed as to payment of principal and interest (but not as to price and yield) by the issuer. For securities issued by GNMA, the payment of principal and interest is backed by the full faith and credit of the U.S. government. Mortgage pass-through certificates issued by FNMA or FHLMC are guaranteed as to payment of principal and interest by the credit of the issuing U.S. government agency. Securities issued by other non-governmental entities (such as commercial banks or mortgage bankers) may offer credit enhancement such as guarantees, insurance, or letters of credit. Mortgage pass-through certificates are subject to more rapid prepayment than their stated maturity date would indicate; their rate of prepayment tends to accelerate during periods of declining interest rates or increased property transfers and, as a result, the proceeds from such prepayments may be reinvested in instruments which have lower yields. The impact of prepayments on the price of a security may be difficult to predict and may increase the volatility of the price.

COLLATERALIZED MORTGAGE OBLIGATIONS. The Credit Select RM Fund may invest directly or indirectly in Collateralized Mortgage Obligations ("CMOs"). CMOs are generally backed by mortgage pass-through securities or whole mortgage loans. CMOs are usually structured into classes of varying maturities and principal payment priorities.

The prepayment sensitivity of each class may or may not resemble that of the CMO's collateral depending on the maturity and structure of that class. CMOs pay interest and principal (including prepayments) monthly, quarterly, or semi-annually. The prices and yields of CMOs are determined, in part, by assumptions about cash flows from the rate of payments of the underlying mortgage. Changes in interest rates may cause the rate of expected prepayments of those mortgages to change. These prepayment risks can make the prices of CMOs very volatile when interest rates change. That volatility will affect the Credit Select RM Fund's share price. Most CMOs are AAA rated, reflecting the credit quality of the underlying collateral; however, some classes carry greater price risk than that of their underlying collateral. The Advisor will invest in classes of CMOs only if their characteristics and interest rate sensitivity fit the investment objective and policies of the Credit Select RM Fund.

OTHER MORTGAGE RELATED SECURITIES. In addition to the mortgage pass through securities and the CMOs mentioned above, the Credit Select RM Fund may also invest directly or indirectly in other mortgage derivative products. In addition to the prepayment risks described above, rapidly rising interest rates could cause prepayments of mortgages to occur at a slower rate than expected, and the expected maturity of short or medium term mortgage-related securities could lengthen as a result. That could cause their values to fluctuate more, and the share price of the Credit Select RM Fund to fluctuate more and to fall. Governmental, government-related, and private entities may create other mortgage-related securities offering mortgage pass through and mortgage collateralized instruments in addition to those described herein. As new types of mortgage-related securities are developed and offered to the investment community, the Credit Select RM Fund may consider making investments in such new types of mortgage-related securities.

ASSET-BACKED SECURITIES. In addition to CMOs, the Credit Select RM Fund may invest directly or indirectly in other asset-backed securities backed by loans such as automobile loans, credit card receivables, marine loans, recreational vehicle loans and manufactured housing loans. Typically asset-backed securities represent undivided fractional interests in a trust whose assets consist of a pool of loans and security interests in the collateral securing the loans. Payments of principal and interest on asset-backed securities are passed through monthly to certificate holders and are usually guaranteed up to a certain amount and time period by a letter of credit issued by a financial institution. In some cases asset-backed securities are divided into senior and subordinated classes so as to enhance the quality of the senior class. Underlying loans are subject to risks of prepayment, which may reduce the overall return to certificate holders. If the letter of credit is exhausted and the full amounts due on underlying loans are not received because of unanticipated costs, depreciation, damage or loss of the collateral securing the contracts, or other factors, certificate holders may experience delays in payment or losses on asset backed securities. The Credit Select RM Fund may invest in other asset backed securities (e.g., equipment trust certificates), including those that may be developed in the future.

EQUIPMENT TRUST CERTIFICATES. The Credit Select RM Fund may invest directly or indirectly in equipment trust certificates which are a type of asset-backed security that represents undivided fractional interests in a trust whose assets consist of a pool of equipment retail installment contracts or leased equipment. The debt issue is secured by the equipment or physical assets, as the title for the equipment is held in trust for the holders of the issue. Equipment trust certificates are subject to the risk that the lessee or payee defaults on its payments, and risks related to potential declines in the value of the equipment that serves as collateral for the issue.

VARIABLE AND FLOATING RATE SECURITIES. The Credit Select RM Fund may invest directly or indirectly in variable or floating rate securities that adjust the interest rate paid at periodic intervals based on an interest rate index. Typically, floating rate securities use as their benchmark an index such as the 1-, 3-, or 6-month LIBOR, 3-, 6-, or 12-month Treasury bills, or the Federal Funds rate. Resets of the rates can occur at predetermined intervals or whenever changes in the benchmark index occur. Changes in the benchmark index and the interest rate may be difficult to predict and may increase the volatility of the price, and have adverse effects on the value of the floating rate securities.

SWAPS. The Credit Select RM Fund may invest directly or indirectly in currency, interest rate, index and other swaps, which involve the exchange by an investor with another party of their respective commitments, in an attempt to obtain a particular return when it is considered desirable to do so, possibly at a lower cost than if the Fund had invested directly in the asset that yielded the desired return. In the case of interest rate swaps, an investor may exchange with another party their respective commitments to pay or receive interest, such as an exchange of fixed rate payments for floating rate payments. Use of swaps subjects the investor to risk of default by the counterparties. If there is a default by a counterparty to such a transaction, there may be contractual remedies pursuant to the agreements related to the transaction although contractual remedies may not be sufficient in the event that a counterparty to the transaction is insolvent. The swap market has grown substantially over the years with a large number of banks and investment banking firms acting both as

principals and agents utilizing standardized swap documentation. As a result, the swap market has become relatively liquid in comparison with the markets for other similar instruments which are traded in the interbank market. An investor may also enter into currency swaps or other swaps which are similar to interest rate swaps but may be surrogates for other instruments such as currency forwards or options. It is possible that recent developments in the swaps market, including new regulatory requirements, could limit, restrict or prevent the Credit Select RM Fund's ability to utilize swap agreements as part of its investment strategy, terminate existing swap agreements or negatively affect amounts to be received under such agreements.

PRIVATE ACTIVITY BONDS. The Credit Select RM Fund may invest directly or indirectly in private activity bonds. The two principal classifications of municipal obligations are "general obligation" and "revenue" bonds. General obligation bonds are secured by the issuer's pledge of its faith, credit, and taxing power for the payment of principal and interest. Revenue bonds are payable from the revenues derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source, but not from the general taxing power. Private activity bonds are in most cases revenue bonds and do not generally carry the pledge of the credit of the issuing municipality. The Credit Select RM Fund's distributions of any interest it earns on municipal obligations will be taxable to shareholders as ordinary income. In addition, if the proceeds from private activity bonds are used for the construction, repair or improvement of privately operated industrial or commercial facilities, the interest paid on such bonds may be excluded from gross income for U.S. federal income tax purposes, although current federal tax laws place substantial limitations on the size of these issues. Sizable investments in these obligations could involve an increased risk to the Credit Select RM Fund should any of the related facilities experience financial difficulties. The obligations of issuers may become subject to laws enacted in the future by Congress, state legislatures, or local governments of referenda extending the time for payment of principal or interest, or imposing other constraints upon enforcement of such obligations or upon the ability of municipalities to levy taxes. Furthermore, as a result of legislation or other conditions, the power or ability of any issuer to pay, when due, the principal of and interest on its municipal obligations may be materially affected.

STRIPS. The Credit Select RM Fund may invest directly or indirectly in stripped securities ("STRIPS"). STRIPS are created by separating the income and principal components of a debt instrument and selling them separately. U.S. Treasury STRIPS (Separate Trading of Registered Interest and Principal of Securities) are created when the coupon payments and the principal payment are stripped from an outstanding Treasury bond by the Federal Reserve Bank. Zero coupon U.S. government securities such as STRIPS are debt obligations that are issued or purchased at a significant discount from face value. The discount approximates the total amount of interest the security will accrue and compound over the period until maturity or the particular interest payment date at a rate of interest reflecting the market rate of the security at the time of issuance. STRIPS do not require the periodic payment of interest. These investments benefit the issuer by mitigating its need for cash to meet debt service, but generally require a higher rate of return to attract investors who are willing to defer receipt of cash. These investments may experience greater volatility in market value than U.S. government securities that make regular payments of interest. If the Credit Select RM Fund invests in STRIPS, the Fund will accrue income on the investment for tax and accounting purposes, which is distributable to shareholders and which, because no cash is received at the time of accrual, may require the liquidation of other portfolio securities to satisfy the Fund's distribution obligations, in which case the Fund would forgo the purchase of additional income producing assets with these funds. The value of these instruments tends to fluctuate more in response to changes in interest rates than the value of ordinary interest-paying debt securities with similar maturities. The risk is greater when the period to maturity is longer.

DEBENTURES. The Credit Select RM Fund may invest directly or indirectly in debentures. A debenture is a long-term, unsecured, debt instrument backed only by the integrity of the borrower, not by collateral, and documented by an indenture. Governments often issue debentures, in part because they generally cannot guarantee debt with assets (government assets are public property). The primary risk with this type of investment is that the issuer will default or go into bankruptcy. As an unsecured creditor, in the event of default or bankruptcy, the holder of a debenture does not have a claim against any specific asset(s) of the issuing firm, so the investor will only be paid from the issuer's assets after the secured creditors have been paid. The Credit Select RM Fund may invest in all types of debentures, including corporate and government debentures.

DEMAND NOTES. The Credit Select RM Fund may invest directly or indirectly in Variable and Floating Rate Demand Notes. Variable and Floating Rate Demand Notes are notes that bear variable or floating interest rates and carry rights that permit holders to demand payment of the unpaid principal balance plus accrued interest from the issuers or certain

financial intermediaries. Variable rate demand notes have a stated maturity in excess of one year, but permit a holder to demand payment of principal plus accrued interest upon a specified number of days notice. Frequently, such obligations are secured by letters of credit or other credit support arrangements provided by banks. The issuer has a corresponding right, after a given period, to prepay in its discretion the outstanding principal of the obligation plus accrued interest upon a specific number of days notice to the holders. The interest rate of a floating rate instrument may be based on a known lending rate, such as a bank's prime rate, and is reset whenever such rate is adjusted. The interest rate on a variable rate demand note is reset at specified intervals at a market rate. These formulas are designed to result in a market value for the Variable Rate Demand Note or Floating Rate Demand Note that approximates its par value. Variable and Floating Rate Demand Notes are subject to interest rate risks.

INVERSE FLOATERS. The Credit Select RM Fund may invest directly or indirectly in inverse floaters. Inverse floaters are municipal obligations on which the interest rates typically fall as market rates increase and increase as market rates fall. Changes in market interest rates or the floating rate of the security inversely affect the residual interest rate of an inverse floater. As a result, the price of an inverse floater will be considerably more volatile than that of a fixed-rate obligation when interest rates change. Inverse floaters are a form of derivative investment. Certain derivatives can be used to increase or decrease the Credit Select RM Fund's exposure to changing security prices, interest rates or other factors that affect the value of securities. However, these techniques could result in losses to the Credit Select RM Fund if the Advisor judges market conditions incorrectly or employs a strategy that does not correlate well with the Fund's other investments. These techniques can cause losses if the counterparty does not perform its promises. An additional risk of investing in municipal securities that are derivative investments is that their market value could be expected to vary to a much greater extent than the market value of municipal securities that are not derivative investments but have similar credit quality, redemption provisions and maturities.

ILLIQUID INVESTMENTS. Each Fund may invest up to 15% of its net assets in illiquid securities, which are investments that cannot be sold or disposed of in the ordinary course of business within seven days at approximately the prices at which they are valued. Under the supervision of the Board of Trustees of the Trust (the "Board"), the Advisor determines the liquidity of the Funds' investments, and through reports from the Advisor, the Board monitors investments in illiquid instruments. In determining the liquidity of a Fund's investments, the Advisor may consider various factors including: (i) the frequency of trades and quotations; (ii) the number of dealers and prospective purchasers in the marketplace; (iii) dealer undertakings to make a market; (iv) the nature of the security (including any demand or tender features); and (v) the nature of the marketplace for trades (including the ability to assign or offset the Fund's rights and obligations relating to the investment). If through a change in values, net assets, or other circumstances, a Fund were in a position where more than 15% of its net assets were invested in illiquid securities, it would seek to take appropriate steps to protect liquidity. An investment in illiquid securities poses risks of potential delays in resale and uncertainty in valuation. Limitations on resale may have an adverse effect on the marketability of portfolio securities and the Funds may be unable to dispose of illiquid securities promptly or at reasonable prices.

If a Fund invests in securities for which there is no ready market, it may not be able to readily sell such securities. Such securities are unlike securities that are traded in the open market, which can be expected to be sold immediately if the market is adequate. The sale price of illiquid securities once realized may be lower or higher than the Advisor's most recent estimate of their fair market value. Generally, less public information is available about the issuers of such securities than about companies whose securities are publicly traded.

RESTRICTED SECURITIES. Within its limitations on investment in illiquid securities, the Funds may purchase restricted securities that generally can be sold in privately negotiated transactions, pursuant to an exemption from registration under the federal securities laws, or in a registered public offering. Where registration is required, a Fund may be obligated to pay all or part of the registration expense and a considerable period may elapse between the time it decides to seek registration and the time the Fund may be permitted to sell a security under an effective registration statement. If during such a period adverse market conditions were to develop, a Fund might obtain a less favorable price than prevailed when it decided to seek registration of the security.

Certain restricted securities are illiquid unless it is determined, based upon a review of the trading markets for a specific restricted security, that such restricted security is liquid because it is so-called "4(a)(2) commercial paper" or is otherwise eligible for resale pursuant to Rule 144A under the Securities Act of 1933 ("144A Securities"). Investing in 144A Securities may decrease the liquidity of the Fund's portfolio to the extent that qualified institutional buyers become for a time uninterested in purchasing these restricted securities. The purchase price and subsequent valuation

of restricted and illiquid securities normally reflect a discount, which may be significant, from the market price of comparable securities for which a liquid market exists. Subject to the oversight of the Board, 144A Securities determined by the Advisor to be liquid in accordance with procedures adopted by the Board shall not be deemed “illiquid securities.”

FUNDING AGREEMENTS. Within the limitations on investments in illiquid securities, the Funds may invest in various types of funding agreements. A funding agreement is, in substance, an obligation of indebtedness negotiated privately between an investor and an insurance company. Funding agreements often have maturity-shortening features, such as an unconditional put, that permit the investor to require the insurance company to return the principal amount of the funding agreement, together with accrued interest, within one year or less. Most funding agreements are not transferable by the investor and, therefore, are illiquid, except to the extent the funding agreement is subject to a demand feature of seven days or less. An insurance company may be subject to special protection under state insurance laws, which protections may impair the ability of the Funds to require prompt performance by the insurance company of its payment obligations under the funding agreement.

OPTIONS. The Funds may purchase directly or indirectly and write put and call options on securities. The Funds may write put or call options only if the option is “covered” by the Fund holding a position in the underlying securities or by other means that would permit immediate satisfaction of the Fund’s obligation as writer of the option. The purchase and writing of options involves certain risks. During the option period, the covered call writer has, in return for the premium on the option, given up the opportunity to profit from a price increase in the underlying securities above the exercise price, but, as long as its obligation as a writer continues, has retained the risk of loss should the price of the underlying security decline. The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying securities at the exercise price. If a put or call option purchased by a Fund is not sold when it has remaining value, and if the market price of the underlying security, in the case of a put, remains equal to or greater than the exercise price or, in the case of a call, remains less than or equal to the exercise price, the Fund will lose its entire investment in the option. Also, where a put or call option on a particular security is purchased to hedge against price movements in a related security, the price of the put or call option may move more or less than the price of the related security. There can be no assurance that a liquid market will exist when a Fund seeks to close out an option position. Furthermore, if trading restrictions or suspensions are imposed on the options market, the Funds may be unable to close out a position.

FUTURES CONTRACTS. The Funds may directly or indirectly invest in futures contracts. A futures contract is a bilateral agreement to buy or sell a security (or deliver a cash settlement price, in the case of a contract relating to an index or otherwise not calling for physical delivery at the end of trading in the contracts) for a set price in the future. Futures contracts are designated by boards of trade that have been designated “contracts markets” by the Commodities Futures Trading Commission (“CFTC”). No purchase price is paid or received when the contract is entered into. Instead, a Fund, upon entering into a futures contract (and to maintain the Fund’s open positions in futures contracts), would be required to segregate cash, cash equivalents, and/or other liquid assets sufficient to satisfy the requirements of Section 18(f) of the 1940 Act. The margin required for a particular futures contract is set by the exchange on which the contract is traded, and may be significantly modified from time to time by the exchange during the term of the contract. Futures contracts are customarily purchased and sold on margin that may range upward from less than 5% of the value of the contract being traded.

If the price of an open futures contract changes (by increase in the case of a sale or by decrease in the case of a purchase) so that the loss on the futures contract reaches a point at which the margin on deposit does not satisfy margin requirements, the broker will require an increase in the margin. However, if the value of a position increases because of favorable price changes in the futures contract so that the margin deposit exceeds the required margin, the broker will pay the excess to the Fund. These subsequent payments, called “variation margin,” to and from the futures broker, are made on a daily basis as the price of the underlying assets fluctuate, making the long and short positions in the futures contract more or less valuable, a process known as “marking to the market.” The Funds seek to earn income on initial and variation margin deposits.

The Funds will incur brokerage fees when they purchase and sell futures contracts. Positions taken in the futures markets are not normally held until delivery or cash settlement is required, but are instead liquidated through offsetting transactions that may result in a gain or a loss. While futures positions taken by a Fund will usually be liquidated in this manner, the Fund may instead make or take delivery of underlying securities whenever it appears economically advantageous for the Fund to do so. A clearing organization associated with the exchange on which futures are traded assumes responsibility for closing out transactions and guarantees that as between the clearing members of an exchange, the sale and purchase obligations will be performed with regard to all positions that remain open at the termination of the contract.

Securities Index Futures Contracts. Purchases or sales of securities index futures contracts may be used in an attempt to protect a Fund's current or intended investments from broad fluctuations in securities prices. A securities index futures contract does not require the physical delivery of securities, but merely provides for profits and losses resulting from changes in the market value of the contract to be credited or debited at the close of each trading day to the respective accounts of the parties to the contract. On the contract's expiration date, a final cash settlement occurs and the futures positions are simply closed out. Changes in the market value of a particular index futures contract reflect changes in the specified index of securities on which the future is based.

By establishing an appropriate "short" position in index futures, the Funds may also seek to protect the value of their portfolios against an overall decline in the market for such securities. Alternatively, in anticipation of a generally rising market, the Funds can seek to avoid losing the benefit of apparently low current prices by establishing a "long" position in securities index futures and later liquidating that position as particular securities are in fact acquired. To the extent that these hedging strategies are successful, the Funds will be affected to a lesser degree by adverse overall market price movements than would otherwise be the case.

Options on Futures Contracts. The Funds may purchase exchange-traded call and put options on futures contracts and write exchange-traded call options on futures contracts. These options are traded on exchanges that are licensed and regulated by the CFTC for the purpose of options trading. A call option on a futures contract gives the purchaser the right, in return for the premium paid, to purchase a futures contract (assume a "long" position) at a specified exercise price at any time before the option expires. A put option gives the purchaser the right, in return for the premium paid, to sell a futures contract (assume a "short" position), for a specified exercise price at any time before the option expires.

The Funds will write options only on futures contracts that are "covered." A Fund will be considered "covered" with respect to a put option it has written if, so long as it is obligated as a writer of the put, the Fund segregates cash, cash equivalents, and/or other liquid assets at all times equal to or greater than the aggregate exercise price of the puts it has written (less any related margin deposited with the futures broker). A Fund will be considered "covered" with respect to a call option it has written on a fixed income security future if, so long as it is obligated as a writer of the call, the Fund owns a security deliverable under the futures contract. A Fund will be considered "covered" with respect to a call option it has written on a securities index future if the Fund owns securities the price changes of which are, in the opinion of the Advisor, expected to replicate substantially the movement of the index upon which the futures contract is based.

Upon the exercise of a call option, the writer of the option is obligated to sell the futures contract (to deliver a "long" position to the option holder) at the option exercise price, which will presumably be lower than the current market price of the contract in the futures market. Upon exercise of a put, the writer of the option is obligated to purchase the futures contract (deliver a "short" position to the option holder) at the option exercise price, which will presumably be higher than the current market price of the contract in the futures market. When the holder of an option exercises it and assumes a long futures position, in the case of a call, or a short futures position, in the case of a put, its gain will be credited to its futures margin account, while the loss suffered by the writer of the option will be debited to its account and must be immediately paid by the writer. However, as with the trading of futures, most participants in the options markets do not seek to realize their gains or losses by exercise of their option rights. Instead, the holder of an option will usually realize a gain or loss by buying or selling an offsetting option at a market price that will reflect an increase or a decrease from the premium originally paid.

If a Fund writes options on futures contracts, the Fund will receive a premium but will assume a risk of adverse movement in the price of the underlying futures contract comparable to that involved in holding a futures position. If the option is not exercised, the Fund will realize a gain in the amount of the premium, which may partially offset

unfavorable changes in the value of securities held in or to be acquired for the Fund. If the option is exercised, the Fund will incur a loss in the option transaction, which will be reduced by the amount of the premium it has received, but which will offset any favorable changes in the value of its portfolio securities or, in the case of a put, lower prices of securities it intends to acquire.

Options on futures contracts can be used by the Funds to hedge substantially the same risks as might be addressed by the direct purchase or sale of the underlying futures contracts. If a Fund purchases an option on a futures contract, it may obtain benefits similar to those that would result if it held the futures position itself. Purchases of options on futures contracts may present less risk in hedging than the purchase and sale of the underlying futures contracts since the potential loss is limited to the amount of the premium plus related transaction costs.

The purchase of put options on futures contracts may be used as a means of hedging the Funds' portfolios against a general decline in market prices. The purchase of a call option on a futures contract may represent a means of hedging a Fund's portfolio against a market advance when the Fund is not fully invested.

The writing of a call option on a futures contract constitutes a partial hedge against declining prices of the underlying securities. If the futures price at expiration is below the exercise price, a Fund will retain the full amount of the option premium, which provides a partial hedge against any decline that may have occurred in the value of the Fund's holdings of securities. The writing of a put option on a futures contract is analogous to the purchase of a futures contract in that it hedges against an increase in the price of securities the Fund intends to acquire. However, the hedge is limited to the amount of premium received for writing the put.

Limitations on Purchase and Sale of Futures Contracts and Options on Futures Contracts. Options and futures can be volatile instruments and involve certain risks. If the Advisor applies a hedge in a Fund's portfolio at an inappropriate time or judges market movements incorrectly, options and futures strategies may lower the Fund's return. A Fund could also experience losses if the prices of its options and futures positions were poorly correlated with its other investments, or if it could not close out its position because of an illiquid market.

In general, the Funds will not directly purchase or sell futures contracts or related options unless either (i) the futures contracts or options thereon are purchased for "bona fide hedging" purposes (as defined under the CFTC regulations); or (ii) if purchased for other purposes, the sum of the amounts of initial margin deposits on a Fund's existing futures and premiums required to establish non-hedging positions, less the amount by which any such options positions are "in-the-money" (as defined under CFTC regulations) would not exceed 5% of the liquidation value of a Fund's total assets.

In instances involving the purchase of futures contracts or the writing of put options thereon by a Fund, the Fund will segregate an amount of cash, cash equivalents and/or other liquid assets equal to the market value of such futures contracts or options written (less any related margin deposits), to the extent that such deposits are required under the 1940 Act.

FORWARD COMMITMENT AND WHEN-ISSUED SECURITIES. The Sector Select RM Fund may purchase securities on a when-issued basis or for settlement at a future date if the Fund holds sufficient assets to meet the purchase price. In such purchase transactions, the Sector Select RM Fund will not accrue interest on the purchased security until the actual settlement. Similarly, if a security is sold for a forward date, the Sector Select RM Fund will accrue the interest until the settlement of the sale. When-issued security purchases and forward commitments have a higher degree of risk of price movement before settlement due to the extended time period between the execution and settlement of the purchase or sale. As a result, the exposure to the counterparty of the purchase or sale is increased. Although the Sector Select RM Fund would generally purchase securities on a forward commitment or when-issued basis with the intention of taking delivery, the Fund may sell such a security prior to the settlement date if the Advisor felt such action was appropriate. In such a case, the Sector Select RM Fund could incur a short-term gain or loss.

SHORT SALES OF SECURITIES. The Sector Select RM Fund may make short sales, which are transactions in which the Fund sells a security it does not own in anticipation of a decline in the market value of that security. To complete a short sale transaction, the Sector Select RM Fund will borrow the security from a broker-dealer, which generally involves the payment of a premium and transaction costs. The Sector Select RM Fund then sells the borrowed security to a buyer in the market. The Sector Select RM Fund will then cover the short position by buying

shares in the market either (i) at its discretion; or (ii) when called by the broker-dealer lender. Until the security is replaced, the Sector Select RM Fund is required to pay the broker-dealer lender any dividends or interest that accrue during the period of the loan. In addition, the net proceeds of the short sale will be retained by the broker to the extent necessary to meet regulatory or other requirements, until the short position is closed out.

The Sector Select RM Fund will incur a loss as a result of the short sale if the price of the security increases between the date of the short sale and the date on which the Fund replaces the borrowed security. The Sector Select RM Fund will realize a gain if the security declines in price between those dates. The amount of any gain will be decreased, and the amount of any loss increased by the amount of the premium, dividends, interest or expenses the Sector Select RM Fund may be required to pay in connection with a short sale. When the Sector Select RM Fund makes a short sale, the Fund will segregate liquid assets (such as cash, U.S. Government securities, or equity securities) on the Fund's books and/or in a segregated account at the Fund's custodian in an amount sufficient to cover the current value of the securities to be replaced as well as any dividends, interest and/or transaction costs due to the broker-dealer lender. In determining the amount to be segregated, any securities that have been sold short by the Sector Select RM Fund will be marked to market daily. To the extent the market price of the security sold short increases and more assets are required to meet the Sector Select RM Fund's short sale obligations, additional assets will be segregated to ensure adequate coverage of the Fund's short position obligations.

In addition, the Sector Select RM Fund may make short sales "against the box," i.e., when the Fund sells a security short while owning securities equivalent in kind and amount to the securities sold short (or securities convertible or exchangeable into such securities) and will hold such securities while the short sale is outstanding. The Sector Select RM Fund will incur transaction costs, including interest, in connection with opening, maintaining, and closing short sales against the box.

INVESTMENTS IN COMPANIES WITH BUSINESS RELATED TO COMMODITIES. As explained under "Fundamental Restrictions" below, the Funds do not invest directly in commodities. However, the Funds may from time to time invest directly or indirectly in securities of companies whose business is related to commodities, or in registered investment companies or other companies that invest directly or indirectly in commodities. For example, a Fund may invest in companies whose business is related to mining of precious or other metals (e.g., gold, silver, etc.) or registered investment companies that invest in securities of mining companies and related instruments (including, without limitation, the underlying commodities). Investments in equity securities of companies involved in mining or related precious metals industries, and the value of the investment companies and other companies that invest in precious metals and other commodities are subject to a number of risks. For example, the prices of precious metals or other commodities can make sharp movement, up or down, in response to cyclical economic conditions, political events or the monetary policies of various countries, any of which may adversely affect the value of companies whose business is related to such commodities, or the value of investment companies and other companies investing in such business or commodities. Furthermore, such companies are subject to risks related to fluctuations of prices and perceptions of value in commodities markets generally.

LENDING OF PORTFOLIO SECURITIES. In order to generate additional income, each Fund may lend portfolio securities in an amount up to 33% of its total assets to broker-dealers, major banks, or other recognized domestic institutional borrowers of securities that the Advisor has determined are creditworthy under guidelines established by the Board. In determining whether a Fund will lend securities, the Advisor will consider all relevant facts and circumstances. The Funds may not lend securities to any company affiliated with the Advisor. Each loan of securities will be collateralized by cash, securities, or letters of credit. A Fund might experience a loss if the borrower defaults on the loan.

The borrower at all times during the loan must maintain with the Fund cash or cash equivalent collateral, or provide to the Fund an irrevocable letter of credit equal in value to at least 100% of the value of the securities loaned. While the loan is outstanding, the borrower will pay the Fund any interest paid on the loaned securities, and the Fund may invest the cash collateral to earn additional income. Alternatively, the Fund may receive an agreed-upon amount of interest income from the borrower who has delivered equivalent collateral or a letter of credit. It is anticipated that the Fund may share with the borrower some of the income received on the collateral for the loan or the Fund will be paid a premium for the loan. Loans are subject to termination at the option of the Fund or the borrower at any time. A Fund may pay reasonable administrative and custodial fees in connection with a loan, and may pay a negotiated portion of the income earned on the cash to the borrower or placing broker. As with other extensions of credit, there are risks of delay in

recovery or even loss of rights in the collateral should the borrower fail financially. If a Fund invests cash collateral from the borrower, there is the risk that such investment may result in a financial loss. In such an event, the Fund would be required to repay the borrower the cash collateral out of the Fund's assets.

Where voting rights with respect to the loaned securities pass with the lending of the securities, the Advisor intends to call the loaned securities to vote proxies, or to use other practicable and legally enforceable means to obtain voting rights, when the Advisor believes a material event affecting the loaned securities will occur or the advisor otherwise believes it necessary to vote.

The Funds did not have any income from securities lending activity during the fiscal year ended August 31, 2017.

ECONOMIC AND REGULATORY RISKS. Although the U.S. economy has seen improvement over the years, the effects of the global financial crisis that began to unfold in 2007 continue to exist and economic growth has been slow and uneven. In response to the crisis, the U.S. and other governments and the Federal Reserve and other foreign central banks took steps to support financial markets, including by keeping interest rates at or near historically low levels. It is unclear how long this support will last and at what levels. The Federal Reserve has shown signs that it is willing to allow interest rates to rise, if only moderately. Further reduction or withdrawal of support by the United States and the Federal Reserve and/or by other governments and their central banks, failure of such efforts or support in response to the crisis, or investor perception that such efforts or support are not succeeding could negatively affect financial markets generally, as well as result in higher interest rates, increase market volatility and reduce the value and liquidity of certain securities, including securities held by the Funds.

In addition, policy and legislative changes in the U.S. and in other countries have been implemented that are affecting many aspects of the financial markets and imposing additional regulatory requirements. Given the broad scope, sweeping nature, and relatively recent enactment of some of these changes, the potential impact they could have on securities held by the Funds is unclear and may not be fully known for some time. These changes and any future regulatory change could adversely affect the Funds.

OPERATIONAL RISK. An investment in the Funds involves operational risk arising from factors such as processing errors, human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel and errors caused by third-party service providers. Any of these failures or errors could result in a loss or compromise of information, regulatory scrutiny, reputational damage or other events, any of which could have a material adverse effect on the Funds. While the Funds seek to minimize such events through controls and oversight, there is no guarantee that the Funds will not suffer losses due to operational risk.

CYBERSECURITY RISK. The Funds and their service providers may be subject to operational and information security risks resulting from breaches in cybersecurity. A breach in cybersecurity refers to both intentional and unintentional events that may cause a Fund to lose or compromise confidential information, suffer data corruption or lose operational capacity. Breaches in cybersecurity include, among other things, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other operational disruptions. Successful cybersecurity breaches of a Fund and/or a Fund's investment adviser, distributor, custodian, the transfer agent or other third party services providers may adversely impact the Fund and its shareholders. For instance, a successful cybersecurity breach may interfere with the processing of shareholder transactions, impact the Funds' ability to calculate their NAV, cause the release of private personal shareholder information, impede trading, subject the Funds to regulatory fines or financial losses, and/or cause reputational damage. The Funds rely on third-party service providers for many day-to-day operations, and are therefore subject to the risk that the protections and protocols implemented by those service providers will be ineffective in protecting the Funds from cybersecurity breaches. Similar types of cybersecurity risks are also present for issuers of securities in which the Funds may invest, which could result in material adverse consequences for such issuers and may cause a Fund's investments in such companies to lose value. There is no guarantee the Funds will be successful in protecting against cybersecurity breaches.

TEMPORARY DEFENSIVE POSITIONS. Each Fund may, from time to time, take temporary defensive positions that are inconsistent with its principal investment strategies in an attempt to respond to adverse market, economic, political or other conditions. In such circumstances, the Sector Select RM Fund may hold up to 100% of its portfolio in Fixed Income and Gold Investments, or solely in Fixed Income Investments or Cash Positions. Similarly in such

circumstances, the Credit Select RM Fund may also hold up to 100% of its portfolio in cash and cash equivalent positions. When a Fund takes a temporary defensive position, the Fund may not be able to achieve its investment objective.

BORROWING. The Funds may, subject to the restrictions of the 1940 Act, borrow money in order to meet redemption requests or for extraordinary or emergency purposes. Borrowing involves the creation of a liability that requires a Fund to pay interest. In the event a Fund should ever borrow money under these conditions, such borrowing could increase the Fund's costs and thus reduce the value of the Fund's assets. In an extreme case, if a Fund's current investment income were not sufficient to meet the interest expense of borrowing, it could be necessary for the Fund to liquidate certain of its investments at an inopportune time.

INVESTMENT LIMITATIONS

The Funds have adopted the following investment limitations, which cannot be changed without approval by holders of a majority of its outstanding voting shares. A "majority" for this purpose means the lesser of (i) 67% of a Fund's outstanding shares represented in person or by proxy at a meeting at which more than 50% of its outstanding shares are represented; or (ii) more than 50% of a Fund's outstanding shares. Unless otherwise indicated, percentage limitations apply at the time of purchase of the applicable securities.

FUNDAMENTAL RESTRICTIONS. As a matter of fundamental policy, the Funds may not:

- (1) Issue senior securities, except as permitted by the 1940 Act;
- (2) Borrow money (including, without limitation, borrowing to meet redemptions), except to the extent permitted under the 1940 Act. For purposes of this investment restriction, the entry into options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices shall not constitute borrowing;
- (3) Pledge, mortgage or hypothecate their assets, except to the extent necessary to secure permitted borrowings and to the extent related to the deposit of assets in escrow in connection with writing covered put and call options and the purchase of securities on a when-issued or forward commitment basis and collateral and initial or variation margin arrangements with respect to options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices;
- (4) Act as underwriter except to the extent that, in connection with the disposition of portfolio securities, the Funds may be deemed to be an underwriter under certain federal securities laws;
- (5) Make loans, provided that each Fund may lend its portfolio securities in an amount up to 33% of total Fund assets, and provided further that, for purposes of this restriction, investment in U.S. Government obligations, short-term commercial paper, certificates of deposit, bankers' acceptances and repurchase agreements shall not be deemed to be the making of a loan;
- (6) Purchase or sell real estate or interests in real estate; provided, however, that the Funds may purchase and sell securities that are secured by real estate and securities of companies that invest or deal in real estate (including, without limitation, investments in REITs and mortgage-backed securities);
- (7) Invest more than 25% of their total assets in securities of issuers in any particular industry. For purposes of this limitation, securities of the U.S. Government (including its agencies and instrumentalities), securities of state or municipal governments and their political subdivisions (other than revenue bonds issued in connection with an identifiable industry; e.g., healthcare or education) and investments in other registered investment companies are not considered to be issued by members of any industry; and
- (8) Purchase or sell commodities, except that the Funds may purchase and sell options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices and may purchase interests in equity securities issued by companies (including, without limitation, investment companies) that hold or invest in one or more commodities as their sole or principal business activity.

NON-FUNDAMENTAL RESTRICTIONS. The following investment limitations are not fundamental and may be changed by the Board without shareholder approval. As a matter of non-fundamental policy, the Funds may not knowingly:

- (1) Purchase securities on margin (but a Fund may obtain such short-term credits as may be necessary for the clearance of transactions). For purposes of this limitation, short sales of securities and futures trades, forward contracts or similar trades requiring margin deposits or other use of a margin account are not considered purchasing securities on margin;
- (2) Make investments for the purpose of exercising control or management over a portfolio company;
- (3) Invest in interests in oil, gas or other mineral exploration or development programs, although the Funds may invest in the common stock of companies that invest in or sponsor such programs;
- (4) Purchase warrants if as a result a Fund would then have more than 5% of its total net assets (taken at the lower of cost or current value) invested in warrants; and
- (5) Invest more than 15% of their net assets (as measured at the time of investment) in illiquid securities, except for securities qualifying for resale under Rule 144A under the Securities Act of 1933, as amended (“Rule 144A”), determined by the Advisor to be liquid, subject to the oversight of the Board. A Fund will not be required to sell illiquid securities if it exceeds the 15% limit due to market activity or the sale of liquid securities. In these situations, however, the Funds will take appropriate measures to reduce the percentage of its assets invested in illiquid securities.

With respect to the “fundamental” and “non-fundamental” investment restrictions above, if a percentage limitation is adhered to at the time of investment, a later increase or decrease in percentage resulting from any change in value or net assets will not result in a violation of such restriction (i.e., percentage limitations are determined at the time of purchase): provided, however, that the treatment of the fundamental restrictions related to borrowing money and issuing senior securities are exceptions to this general rule.

Senior securities may include any obligation or instrument issued by a fund evidencing indebtedness. The 1940 Act generally prohibits funds from issuing senior securities, although it does not treat certain transactions as senior securities, such as certain borrowings, short sales, reverse repurchase agreements, firm commitment agreements and standby commitments, with appropriate earmarking or segregation of assets to cover such obligation.

The 1940 Act permits each Fund to borrow money from banks in an amount up to one-third of its total assets (including the amount borrowed) less its liabilities (not including any borrowings but including the fair market value at the time of computation of any other senior securities then outstanding). In general, each Fund may not issue any class of senior security, except that a Fund may (i) borrow from banks, provided that immediately following any such borrowing there is an asset coverage of at least 300% for all Fund borrowings and in the event such asset coverage falls below 300%, the Fund will within three days (excluding holidays and Sundays) or such longer period as the SEC may prescribe by rules and regulation, reduce the amount of its borrowings to an extent that the asset coverage of such borrowings shall be at least 300%, and (ii) engage in trading practices that could be deemed to involve the issuance of a senior security, including options, futures, forward contracts and reverse repurchase agreements, provided that the Fund earmarks or segregates liquid assets in accordance with applicable SEC regulations and interpretations.

PORTFOLIO TRANSACTIONS

Subject to the general supervision of the Board, the Advisor is responsible for, makes decisions with respect to, and places orders for all purchases and sales of portfolio securities for each Fund. The Advisor shall manage each Fund’s portfolio in accordance with the terms of the investment advisory agreement between the Advisor and the Fund, which is described in detail under “Management and Other Service Providers – Investment Advisor.” The Advisor serves as investment adviser for a number of client accounts, in addition to the Funds.

Brokerage Selection. The Funds have adopted, and the Board has approved, policies and procedures relating to the direction of portfolio securities transactions to brokers. In accordance with these policies and procedures, in selecting brokers to be used in portfolio transactions, the Advisor's general guiding principle is to obtain the best overall execution for each trade, which is a combination of price and execution. With respect to execution, the Advisor considers a number of factors, including, without limitation, the actual handling of the order, the ability of the broker to settle the trade promptly and accurately, the financial standing of the broker, the ability of the broker to position stock to facilitate execution, the Advisor's past experience with similar trades and other factors that may be unique to a particular order. Recognizing the value of these judgmental factors, the Advisor may select brokers who charge a brokerage commission that is higher than the lowest commission that might otherwise be available for any given trade. The Advisor may not give consideration to sales of shares of the Funds as a factor in selecting brokers to execute portfolio transactions. The Advisor may, however, place portfolio transactions with brokers that promote or sell the Funds' shares so long as such transactions are done in accordance with the policies and procedures established by the Board that are designed to ensure that the selection is consistent with the Advisor's obligation to obtain best execution and not based upon the broker's sales efforts.

Under Section 28(e) of the Securities Exchange Act of 1934 and the investment advisory agreements, the Advisor is authorized to pay a brokerage commission in excess of what another broker might have charged for effecting the same transaction, in recognition of the value of brokerage and/or research services provided by the broker. The research received by the Advisor may include, without limitation: information on the U.S. and other world economies; information on specific industries, groups of securities, individual companies, political and other relevant news developments affecting markets and specific securities; technical and quantitative information about markets; analysis of proxy proposals affecting specific companies; accounting and performance systems that allow the Advisor to determine and track investment results; and trading systems that allow the Advisor to interface electronically with brokerage firms, custodians and other providers. Research may be received in the form of written reports, telephone contacts, personal meetings, research seminars, software programs and access to computer databases. In some instances, research products or services received by the Advisor may also be used by the Advisor for functions that are not research related (i.e. not related to the making of investment decisions). Where a research product or service has a mixed use, the Advisor will make a reasonable allocation according to its use and will pay for the non-research function in cash using its own funds.

The research and investment information services described above make available to the Advisor for its analysis and consideration the views and information of individuals and research staffs of other securities firms. These services may be useful to the Advisor in connection with advisory clients other than the Funds and not all such services may be useful to the Advisor in connection with the Funds. Although such information may be a useful supplement to the Advisor's own investment research in rendering services to the Funds, the value of such research and services is not expected to materially reduce the expenses of the Advisor in the performance of its services under the investment advisory agreements and will not reduce the management fees payable to the Advisor by the Funds.

The Funds may invest in securities traded in the over-the-counter market. In these cases, the Funds may initiate trades through brokers on an agency basis and pay a commission in connection with the transaction. The Funds may also effect these transactions by dealing directly with the dealers who make a market in the securities involved, in which case the costs of such transactions would involve dealer spreads rather than brokerage commissions.

During the fiscal years ended August 31, 2017, 2016 and 2015, the Sector Select RM Fund paid \$14,548, \$18,427 and \$6,534, respectively in brokerage commissions. During the fiscal years ended August 31, 2017 and 2016 and the fiscal period ended August 31, 2015, the Credit Select RM Fund paid \$87,290, \$48,571 and \$68,429, respectively, in brokerage commissions. The variances in brokerage commissions paid by the Funds during the past two fiscal periods were primarily attributable to market volatility. During the fiscal year ended August 31, 2017, the Funds did not pay brokerage commissions to brokers providing research services to the Funds.

Aggregated Trades. While investment decisions for the Funds are made independently from those for any other accounts advised or managed by the Advisor, such other advisory clients may invest in the same securities as the Funds. To the extent permitted by law, the Advisor may aggregate the securities to be sold or purchased for the Funds with those to be sold or purchased for other investment companies or accounts advised or managed by the Advisor in executing transactions. When a purchase or sale of the same security is made as part of an aggregated trade, the transaction will be averaged as to price and available investments allocated as to amount in a manner that the Advisor believes to be equitable

to the Funds and other participating accounts. In some instances, this investment procedure may adversely affect the price paid or received by the Funds or the size of the position obtained or sold by the Funds.

Portfolio Turnover. The portfolio turnover rate for the Funds is calculated by dividing the lesser of purchases or sales of portfolio securities for the reporting period by the monthly average value of the portfolio securities owned during the reporting period. The calculation excludes all securities whose maturities or expiration dates at the time of acquisition are one year or less. Portfolio turnover of the Funds may vary greatly from year to year as well as within a particular year, and may be affected by cash requirements for redemption of shares and by requirements that enable the Funds to receive favorable tax treatment. Portfolio turnover will not be a limiting factor in making investment decisions, and the Funds may engage in short-term trading to achieve its investment objectives. High rates of portfolio turnover could lower performance of a Fund due to increased transaction costs and may also result in the realization of short-term capital gains taxed at ordinary income tax rates. During the last two fiscal years, the portfolio turnover rates of the Funds were:

Fund	Fiscal Year Ended August 31, 2017	Fiscal Year Ended August 31, 2016
Sector Select RM Fund	346%	472%
Credit Select RM Fund	414%	326%

The decrease in the Sector Select RM Fund’s portfolio turnover rate in 2017 was primarily attributable to lower overall equity market volatility in 2017. The increase in the Credit Select RM Fund’s portfolio turnover rate in 2017 was primarily attributable to the Fund’s move away from its temporary defensive position.

DESCRIPTION OF THE TRUST

The Trust, which is a statutory trust organized under Delaware law on June 27, 2013, is an open-end management investment company. The Trust’s Agreement and Declaration of Trust (the “Trust Instrument”) authorizes the Board to divide shares into series, each series relating to a separate portfolio of investments, and to classify and reclassify any unissued shares into one or more classes of shares of each such series. The Trust currently consists of two funds, the Sector Select RM Fund and the Credit Select RM Fund. Each fund has two classes of shares, which are referred to in each fund as “Institutional Shares” and “Investor Shares.” Each class of shares represents an interest in the same assets of the Fund, has the same rights and is identical in all material respects, except that (1) the classes bear different (or no) levels of sales loads and different expenses; (2) certain class specific expenses will be borne solely by the class to which such expenses are attributable, including transfer agent fees attributable to a specific class of shares, printing and postage expenses related to preparing and distributing materials to current shareholders of a specific class, registration fees incurred by a specific class of shares, the expense of administrative personnel and services required to support the shareholders of a specific class, litigation or other legal expenses relating to a class of shares, fees or expenses incurred by members of the Board (the “Trustees”) as a result of issues relating to a specific class of shares and accounting fees and expenses relating to a specific class of shares; and (3) each class has exclusive voting rights with respect to matters relating to its own distribution arrangements (see below for additional information). The number of shares of the Trust shall be unlimited. When issued for payment as described in the Funds’ Prospectus and this SAI, shares of the Funds will be fully paid and non-assessable and shall have no preemptive or conversion rights.

In the event of a liquidation or dissolution of the Trust or a Fund, shareholders would be entitled to receive the assets available for distribution belonging to the Fund(s). Shareholders of the Funds are entitled to participate equally in the net distributable assets of the Funds upon liquidation, based on the number of shares of a Fund(s) that are held by each shareholder. At any time where there is more than one series of the Trust, if there are any assets, income, earnings, proceeds, funds, or payments that are not readily identifiable as belonging to any particular fund, the Board shall allocate them among any one or more of the funds as they, in their sole discretion, deem fair and equitable.

Shareholders of all series of the Trust, including the Funds, will vote together and not separately on a series-by-series or class-by-class basis, except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interests of the shareholders of a particular series or class. The Trust has adopted a Rule 18f-3 Multi-Class Plan that contains the general characteristics of, and conditions under which the Trust may offer multiple classes of shares of each series. Rule 18f-2 under the 1940 Act provides that any matter required to be submitted to the holders

of the outstanding voting securities of an investment company such as the Trust shall not be deemed to have been effectively acted upon unless approved by the holders of a majority of the outstanding shares of each series or class affected by the matter. A series or class is affected by a matter unless it is clear that the interests of each series or class in the matter are substantially identical or that the matter does not affect any interest of the series or class. Under Rule 18f-2, the approval of an investment advisory agreement or any change in a fundamental investment policy would be effectively acted upon with respect to a series only if approved by a majority of the outstanding shares of such series. However, the Rule also provides that the ratification of the appointment of independent accountants, the approval of principal underwriting contracts and the election of Trustees may be effectively acted upon by shareholders of the Trust voting together, without regard to a particular series or class. Rights of shareholders cannot be modified by less than a majority vote.

Shareholders are entitled to one vote for each full share and a fractional vote for each fractional share held. Shares of all series of the Trust have equal voting rights and liquidation rights. Shares have non-cumulative voting rights, which means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees and, in this event, the holders of the remaining shares voting will not be able to elect any Trustees. Rights of shareholders cannot be modified by less than a majority vote. The Trust will comply with the provisions of Section 16(c) of the 1940 Act in order to facilitate communications among shareholders.

The Trustees will hold office indefinitely, except that: (i) any Trustee may resign or retire; and (ii) any Trustee may be removed: (a) any time by written instrument signed by at least two-thirds of the number of Trustees prior to such removal; (b) at any meeting of shareholders of the Trust by a vote of two-thirds of the outstanding shares of the Trust; or (c) by a written declaration signed by shareholders holding not less than two-thirds of the outstanding shares of the Trust. In case a vacancy on the Board shall for any reason exist, the vacancy shall be filled by the affirmative vote of a majority of the remaining Trustees, subject to certain restrictions under the 1940 Act. Otherwise, there will normally be no meeting of shareholders for the purpose of electing Trustees, and the Trust does not expect to hold an annual meeting of shareholders.

The Trust Instrument provides that the Trustees will not be liable in any event in connection with the affairs of the Trust, except as such liability may arise from a Trustee's bad faith, willful misfeasance, gross negligence, or reckless disregard of duties. It also provides that all third parties shall look solely to the Trust property for satisfaction of claims arising in connection with the affairs of the Trust. With the exceptions stated, the Trust Instrument provides that a Trustee or officer is entitled to be indemnified against all liability in connection with the affairs of the Trust.

The Trust will not hold annual shareholders' meetings unless required by law. There will normally be no annual meeting of shareholders in any year in which the election of Trustees by shareholders is not required by the 1940 Act. As set forth in the Trust's By-Laws, shareholders of the Trust have the right, under certain conditions, to call a special meeting of shareholders, including a meeting to consider removing a Trustee.

MANAGEMENT AND OTHER SERVICE PROVIDERS

The Board is responsible for the management and supervision of the Funds. The Board approves all significant agreements between the Trust, on behalf of the Funds, and those companies that furnish services to the Funds; reviews performance of the Funds; and oversee the business activities of the Funds. This section of the SAI provides information about the persons who serve as Trustees and executive officers to the Trust, as well as the entities that provide services to the Trust.

TRUSTEES AND OFFICERS Following are the Trustees and executive officers of the Trust, their age and address, their present position with the Trust, and their principal occupation during the past five years. Those Trustees who are "interested persons" as defined in the 1940 Act and those Trustees who are not an "interested person" as defined in the 1940 Act ("Independent Trustees"), are identified in the table. The address of each Trustee and executive officer of the Trust, unless otherwise indicated, is 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246.

Name and Age	Position(s) held with Trust	Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee	Other Directorships Held by Trustee During the Past 5 Years
INDEPENDENT TRUSTEES					
James H. Speed, Jr. (born 1953)	Trustee	Since 2013	Retired, Private Investor (2016 to present); President and CEO of NC Mutual Life Insurance Company (insurance company) (2003-2015).	2	Independent Trustee of Centaur Mutual Funds Trust for its one series; Independent Trustee of Hillman Capital Management Investment Trust for its one series, Brown Capital Management Mutual Funds for its four series, and Starboard Investment Trust for its seventeen series (all registered investment companies); Independent Trustee of Chesapeake Investment Trust for its one series; Member of Board of Directors of M&F Bancorp, Inc.; Member of Board of Directors of Investors Title Company; previously a Member of Board of Directors of Federal Reserve Bank of Richmond; previously,
Thomas G. Douglass (born 1956)	Trustee	Since 2013	Principal, Douglass and Douglass, Attorneys	2	Independent Trustee of Centaur Mutual Funds Trust for its one series.
INTERESTED TRUSTEE*					
Wayne F. Wilbanks (born 1960)	Trustee and President	Since 2013	Mr. Wilbanks has served as Managing Principal and Chief Investment Officer of the Advisor and chaired its Investment Committee since 1990.	2	None
* Mr. Wilbanks is an Interested Trustee because he is an employee and a principal of the Advisor.					
OTHER EXECUTIVE OFFICERS					
Matthew A. Swendiman (born 1973)	Chief Compliance Officer	Since 2017	Attorney of Graydon Head and Ritchey LLP (September 2012 to present) and Chief Executive Officer of Graydon Compliance Solutions, LLC (February 2014 to present).	n/a	n/a
Roger H. Scheffel Jr. (born 1968)	Vice President	Since 2013	Portfolio manager of the Advisor since 2009.	n/a	n/a
Stephen L. Preston (born 1966)	AML Compliance Officer	Since 2013	Vice President and Chief Compliance Officer of Ultimus Fund Distributors, LLC and Vice President of Ultimus Fund Solutions, LLC since 2011; Senior Consultant at Mainstay Capital Markets Consultants (2010 to 2011)	n/a	n/a
Simon H. Berry (born 1971)	Secretary	Since 2017	Senior Attorney at Ultimus Fund Solutions, LLC (2016 to present); Staff Attorney Supervisor, Kentucky Department of Financial Institutions (2009 to 2016).	n/a	n/a
Theresa M. Bridge (born 1969)	Treasurer (Principal Financial Officer)	Since 2013	Vice President and Director of Financial Administration of Ultimus Fund Solutions, LLC (since 2000)	n/a	n/a

Board Structure

The Trust's Board includes two Independent Trustees and one Interested Trustee. Mr. Speed, one of the Trust's Independent Trustees, serves as Chairman of the Board. The Chairman presides at all Board Meetings, Executive Sessions of the Independent Trustees and meetings of the Committee of Independent Trustees. The Chairman facilitates communication and coordination between the Independent Trustees and management and works closely with Trust counsel. He also reviews meeting agendas for the Board and the information provided by management to the Independent Trustees. He is also assisted by Mr. Wilbanks as President of the Trust. Mr. Wilbanks, with the assistance of the Trust's other officers, oversees the daily operations of the Funds, including monitoring the activities of all of the Funds service providers.

The Board believes that its leadership structure, including having two out of three Trustees as Independent Trustees, coupled with the responsibilities undertaken by Mr. Wilbanks as President and Mr. Speed as the Chairman, is appropriate and in the best interests of the Trust. The Board also believes its leadership structure facilitates the orderly and efficient flow of information to the Independent Trustees from Trust management.

With respect to risk oversight, the Board holds four regular meetings each year to consider and address matters involving the Trust and its series. During these meetings, the Board receives reports from Trust management, the Funds' administrator, transfer agent and distributor, and the Trust's Chief Compliance Officer (the "CCO"), on regular quarterly items and, where appropriate and as needed, on specific issues. As part of its oversight function, the Board also may hold special meetings or communicate directly with Trust management or the CCO to address matters arising between regular meetings.

Board Committee. The Board has established a Committee of Independent Trustees, the principal functions of which are: (i) to appoint, retain and oversee the Trust's independent registered public accounting firm; (ii) to meet separately with the independent registered public accounting firm and receive and consider a report concerning its conduct of the audit, including any comments or recommendations it deems appropriate; (iii) to select and nominate all persons to serve as Independent Trustees; (iv) to act as the Trust's proxy voting committee under the Trust's Proxy Voting and Disclosure Policy; and (v) to act as the Trust's qualified legal compliance committee ("QLCC"), as defined in the regulations under the Sarbanes-Oxley Act. In selecting and nominating persons to serve as Independent Trustees, the Committee will not consider nominees recommended by shareholders of the Trust.

Messrs. Speed and Douglass are the members of the Committee of Independent Trustees. The Committee of Independent Trustees met once during the Trust's last fiscal year.

Risk Oversight. The operation of a mutual fund, including its investment activities, generally involves a variety of risks. As part of its oversight of the Funds, the Board oversees risk through various regular board and committee activities. The Board, directly or through its Committee of Independent Trustees, reviews reports from, among others, the Advisor, the Trust's CCO, the Trust's independent registered public accounting firm, and outside legal counsel, regarding risks faced by the Funds and the risk management programs of the Advisor, with respect to the Funds' investment and trading activities, and certain service providers. The actual day-to-day risk management with respect to the Funds resides with the Advisor, for the Fund's investment and trading activities, and other service providers to the Fund. Although the risk management policies of the Advisor and the service providers are designed to be effective, there is no guarantee that they will anticipate or mitigate all risks. Not all risks that may affect the Funds can be identified, eliminated or mitigated and some risks simply may not be anticipated or may be beyond the control of the Board or the Advisor or other service providers. The Independent Trustees meet separately with the Trust's CCO at least annually, outside the presence of management, to discuss issues related to compliance. Furthermore, the Board receives an annual written report from the Trust's CCO regarding the operation of the compliance policies and procedures of the Trust and its primary service providers. As part of its oversight function, the Board also may hold special meetings or communicate directly with Trust management or the Trust's CCO to address matters arising between regular meetings.

The Board also receives quarterly reports from the Advisor on the investments and securities trading of the Funds, including its investment performance, as well as reports regarding the valuation of the Funds' securities. The Board also receives quarterly reports from the Funds' administrator, transfer agent and distributor on regular quarterly items and, where appropriate and as needed, on specific issues. In addition, in its annual review of the Funds' investment advisory agreements, the Board will review information provided by the Advisor relating to its operational capabilities, financial condition and resources. The Board also conducts an annual self-evaluation that includes a review of its

effectiveness in overseeing, among other things, the number of funds in the Trust and the effectiveness of the Board's committee structure.

Qualification of Trustees

The Board has considered each Trustee's experience, qualifications, attributes and skills in light of the Board's function and the Trust's business and structure, and has determined that each Trustee possesses experience, qualifications, attributes and skills that enable the Trustee to be an effective member of the Board. In this regard, the Board has considered the following specific experience, qualifications, attributes and/or skills for each Trustee:

Mr. Wilbanks has experience as an investor, including his roles as a portfolio manager of the Advisor, and has management experience as its CEO. Mr. Douglass has experience in and knowledge of the financial industry as an individual investor and in his role as a trustee on another mutual fund board. He is also an attorney with experience in dealing with trusts and has knowledge of securities laws from previously serving as an arbitrator for the National Association of Securities Dealers, which is now part of the Financial Industry Regulatory Authority. Mr. Speed has experience in and knowledge of the financial industry as an individual investor and in his role as a trustee on several other mutual fund boards. He also has business experience as President and CEO of an insurance company and as President of a company in the business of consulting and private investing.

The Board has determined that, collectively, the Trustees' careers and background, combined with their interpersonal skills and general understanding of financial and other matters, enable the Trustees to effectively participate in and contribute to the Board's functions and oversight of the Trust. References to the qualifications, attributes and skills of Trustees are pursuant to requirements of the SEC, do not constitute holding out the Board or any Trustee as having any special expertise or experience, and shall not impose any greater responsibility on any such person or on the Board by reason thereof.

Beneficial Ownership of Shares of the Funds. The table below shows, for each Trustee, the value of shares of the Funds beneficially owned, and the aggregate value of investments in shares of all Funds in the Fund complex, as of December 31, 2016, and stated as one of the following ranges: A = None; B = \$1-\$10,000; C = \$10,001-\$50,000; D = \$50,001-\$100,000; and E = over \$100,000.

Name of Trustee*	Dollar Range of Shares of the Sector Select RM Fund Owned by Trustee	Dollar Range of Shares of the Credit Select RM Fund Owned by Trustee	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen By Trustee in Family of Investment Companies
James H. Speed, Jr.	C	A	C
Thomas G. Douglass	B	A	B
Wayne F. Wilbanks	E	E	E

* Each Trustee serves as a trustee to the two Funds of the Trust.

Ownership In Fund Affiliates. As of December 31, 2016, none of the Independent Trustees, nor members of their immediate families, owned, beneficially or of record, securities of the Advisor, the Funds' principal underwriter or any affiliate of the Advisor or the principal underwriter.

Compensation. Officers of the Trust and the Trustees who are interested persons of the Trust or the Advisor receive no salary from the Trust. Each Independent Trustee receives a fee of \$2,000 each year plus \$500 per series of the Trust per meeting attended in person and \$200 per series of the Trust per meeting attended by telephone. The Funds reimburse each Trustee and officer of the Trust for his or her travel and other expenses relating to attendance at Board or committee meetings. The following table reflects the amount of compensation received by each Trustee during the fiscal year ended August 31, 2017:

Name of Trustee	Aggregate Compensation From the Trust	Pension or Retirement Benefits Accrued As Part of Trust Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From the Trust Paid to Trustees
Independent Trustees				
James H. Speed, Jr.	\$7,000	None	None	\$7,000
Thomas G. Douglass	\$6,400	None	None	\$6,400
Interested Trustees				
Wayne F. Wilbanks	None	None	None	None

Principal Holders of Voting Securities. As of December 1, 2017, the Trustees and officers of the Trust as a group owned beneficially (i.e., had direct or indirect voting and/or investment power) less than 1% of the then outstanding shares of the Investor Class shares and the Institutional Class shares of each Fund. On the same date, the following shareholders owned of record more than 5% of the outstanding shares of beneficial interest of the Funds:

WSTCM Sector Select Risk - Managed Fund - Investor shares:

Name and Address of Record Owner	Amount of Ownership	Percentage Ownership
Charles Schwab & Co., Inc. Special Custody A/C FBO Customers Attn: Mutual Funds Dept 211 Main Street San Francisco, California 94105	74,803.178 shares	100.00%

WSTCM Sector Select Risk - Managed Fund - Institutional shares:

Name and Address of Record Owner*	Amount of Ownership	Percentage Ownership
Charles Schwab & Co., Inc. Special Custody A/C FBO Customers Attn: Mutual Funds Dept 211 Main Street San Francisco, California 94105	1,347,450.557 shares	99.86%

WSTCM Credit Select Risk - Managed Fund - Investor shares:

Name and Address of Record Owner*	Amount of Ownership	Percentage Ownership
Charles Schwab & Co., Inc. Special Custody A/C FBO Customers Attn: Mutual Funds Dept 211 Main Street San Francisco, California 94105	5,647,024.786 shares	99.76%

WSTCM Credit Select Risk - Managed Fund - Institutional shares:

Name and Address of Record Owner*	Amount of Ownership	Percentage Ownership
Charles Schwab & Co., Inc. Special Custody A/C FBO Customers Attn: Mutual Funds Dept 211 Main Street San Francisco, California 94105	4,267,378.208 shares	97.76%

** A shareholder owning of record or beneficially more than 25% of a Fund's outstanding shares may be considered a controlling person. That shareholder's vote could have a more significant effect on matters presented at a shareholders' meeting than the vote of other shareholders. However, the Funds do not believe that such entity has a beneficial interest of such shares.*

CODES OF ETHICS. The Trust, the Advisor and the Funds' principal underwriter have each adopted a code of ethics, as required by Rule 17j-1 under the 1940 Act, that is designed to prevent personnel of the Trust, the Advisor and the Funds' principal underwriter subject to the codes from engaging in deceptive, manipulative, or fraudulent activities in connection with securities held or to be acquired by the Funds (which securities may also be held by persons subject to the codes). The codes of ethics permit personnel of the Trust, the Advisor and the principal underwriter subject to the codes to invest in securities, including securities that may be purchased or held by the Funds, subject to certain restrictions and pre-approval requirements. In addition, the codes of ethics of the Trust, the Advisor and the principal underwriter require that access persons of such entities report their personal securities transactions and holdings, which are reviewed for compliance with the code of ethics.

ANTI-MONEY LAUNDERING PROGRAM. The Trust has adopted an anti-money laundering ("AML") program, as required by applicable law, that is designed to prevent the Funds from being used for money laundering or the financing of terrorist activities. The Trust's AML Compliance Officer is responsible for implementing and monitoring the operations and internal controls of the program. Compliance officers at certain of the Funds' service providers are also responsible for monitoring aspects of the AML program. The AML program is subject to the continuing oversight of the Board.

PROXY VOTING POLICIES. The Trust has adopted a proxy voting and disclosure policy that delegates to the Advisor the authority to vote proxies for the Funds, subject to oversight of the Board. In the event of a conflict between the interest of the Funds' shareholders, on the one hand, and those of the Advisor, on the other hand, the Trust's proxy voting committee (which is comprised of Independent Trustees) is responsible for determining how the Funds should cast their votes. Copies of the Trust's Proxy Voting and Disclosure Policy and the Advisor's Proxy Voting and Disclosure Policy are included as Appendix B to this SAI.

No later than August 31 of each year, the Trust files Form N-PX with the SEC. Form N-PX states how the Trust voted proxies relating to portfolio securities during the most recent 12-month period ended June 30. The Trust's proxy voting records, as set forth in its most recent Form N-PX filing, are available upon request, without charge, by calling 1-866-515-4626. This information is also available on the SEC's website at <http://www.sec.gov>.

INVESTMENT ADVISOR. Information about the Advisor, Wilbanks, Smith & Thomas Asset Management, LLC, d/b/a WST Capital Management, 150 W. Main Street, Suite 1700, Norfolk, VA 23510, and its duties and compensation is described in the Prospectus. The Advisor, organized as a Virginia limited liability company, is controlled by Wayne F. Wilbanks.

The Advisor supervises the Funds' investments pursuant to investment advisory agreements. The Funds' investment advisory agreements are effective for a one year period and will remain in effect on a year to year basis thereafter only so long as such renewal and continuance is specifically approved at least annually by the Board or by vote of a majority of the Funds' outstanding voting securities, provided the continuance is also approved by a majority of the Independent Trustees. The Funds' investment advisory agreements are terminable without penalty on 60 days' notice by the Board or by vote of a majority of the outstanding voting securities of the Funds. Each of the investment advisory agreements provides that it will terminate automatically in the event of its "assignment," as such term is defined in the 1940 Act.

The Advisor manages the Funds' investments in accordance with the stated investment objective and policies of the Funds, subject to the oversight of the Board. The Advisor is responsible for investment decisions, and provides the Funds with portfolio managers to execute purchases and sales of securities.

Under the investment advisory agreements, the Advisor is not liable for any error of judgment or mistake of law or for any loss suffered by a Fund in connection with the matters to which the investment advisory agreements relate, except a loss resulting from a breach of fiduciary duty with respect to the receipt of compensation for services; or a loss resulting

from willful misfeasance, bad faith, or gross negligence on the part of the Advisor in the performance of its duties; or from the reckless disregard of its duties and obligations under the investment advisory agreements.

The Advisor receives a monthly advisory fee equal to an annual rate of 0.75% of the Sector Select RM Fund's net assets. In addition, the Advisor has entered into an Expense Limitation Agreement on behalf of the Sector Select RM Fund, under which the Advisor has agreed to waive or reduce its fees and to assume other expenses of the Fund, if necessary, in an amount that limits annual operating expenses (exclusive of interest, taxes, brokerage fees and commissions, extraordinary expenses, payments, if any, under the Rule 12b-1 Plan and Acquired Fund Fees and Expenses) to not more than 1.25% of the Fund's average daily net assets until January 1, 2019. It is expected that the Expense Limitation Agreement will continue from year-to-year provided such continuance is approved by the Board.

The Advisor receives a monthly advisory fee equal to an annual rate of 0.60% of the Credit Select RM Fund's net assets. In addition, the Advisor has entered into an Expense Limitation Agreement on behalf of the Credit Select RM Fund, under which the Advisor has agreed to waive or reduce its fees and to assume other expenses of the Fund, if necessary, in an amount that limits annual operating expenses (exclusive of interest, taxes, brokerage fees and commissions, extraordinary expenses, payments, if any, under the Rule 12b-1 Plan and Acquired Fund Fees and Expenses) to not more than 1.15% of the Fund's average daily net assets until January 1, 2019. It is expected that the Expense Limitation Agreement will continue from year-to-year provided such continuance is approved by the Board.

During the last three fiscal years the Advisor received the following management fees, net of fee waivers, from the Funds:

Sector Select RM Fund:

	Advisory Fees Accrued	Advisory Fee Waivers	Operating Expense Reimbursements	Net Advisory Fees Received by Advisor
Fiscal Year Ended August 31, 2017	\$126,170	\$72,196	\$50,792	\$3,182
Fiscal Year Ended August 31, 2016	\$133,219	\$110,439	\$ 0	\$22,780
Fiscal Year Ended August 31, 2015	\$117,517	\$117,517	\$ 3,942	\$ 0

Credit Select RM Fund:

	Advisory Fees Accrued	Advisory Fee Waivers	Net Advisory Fees Received by Advisor
Fiscal Year Ended August 31, 2017	\$506,865	\$0	\$506,865
Fiscal Year Ended August 31, 2016	\$354,178	\$0	\$354,178
Fiscal Period Ended August 31, 2015	\$281,826	\$0	\$281,826

PORTFOLIO MANAGERS. A management team consisting of Wayne F. Wilbanks, CFA, Roger H. Scheffel Jr. and Tom McNally, CMT, CFA is responsible for the day-to-day management of each Fund's portfolio.

Compensation. Each of the portfolio managers receives a base salary from the Advisor. Each of Messrs. Scheffel and McNally also receive compensation based on the amount of portfolio assets he respectively manages. In addition, as stated above, Mr. Wilbanks is the controlling owner of the Advisor, and is accordingly entitled to profits related to his ownership. The portfolio managers' compensation is not directly linked to the Funds' performance, though positive performance and growth in managed assets are factors that may contribute to the Advisor's revenues and distributable profits.

Ownership of Fund Shares. The table below shows the value of shares of the Funds owned by each portfolio manager as of August 31, 2017, stated as one of the following ranges: A = None; B = \$1-\$10,000; C = \$10,001-\$50,000; D = \$50,001-\$100,000; E = \$100,001-\$500,000; F = \$500,001-\$1,000,000; and G = over \$1,000,000.

Portfolio Manager	Dollar Range of Shares of the Sector Select RM Fund	Dollar Range of Shares of the Credit Select RM Fund
Wayne F. Wilbanks	G	F
Roger H. Scheffel Jr.	E	A
Tom McNally	A	A

Other Accounts. In addition to the Funds, the portfolio managers are responsible for the day-to-day management of certain other accounts. The table below shows the number of, and total assets in, such other accounts as of August 31, 2017.

Name of Portfolio Manager	Type of Accounts	Total Number of Other Accounts Managed	Total Assets of Other Accounts Managed	Number of Accounts Managed with Advisory Fee Based on Performance	Total Assets of Accounts with Advisory Fee Based on Performance
Wayne F. Wilbanks	Other Registered Investment Companies:	0	\$0	\$0	\$0
	Other Pooled Investment Vehicles:	7	\$89.1 million	\$0	\$0
	Other Accounts:	776	\$678.7 million	\$0	\$0
Roger H. Scheffel Jr.	Other Registered Investment Companies:	0	\$0	\$0	\$0
	Other Pooled Investment Vehicles:	7	\$89.1 million	\$0	\$0
	Other Accounts:	254	\$314.7 million	\$0	\$0
Tom McNally	Other Registered Investment Companies:	0	\$0	\$0	\$0
	Other Pooled Investment Vehicles:	7	\$89.1 million	\$0	\$0
	Other Accounts:	51	\$2.8 million	\$0	\$0

Conflicts of Interests. The portfolio managers' management of other accounts may give rise to potential conflicts of interest in connection with their management of the Funds' investments, on the one hand, and the investments of the other accounts, on the other. These other accounts include separately managed private clients and other pooled investment vehicles (the "Other Accounts"). The Other Accounts might have similar investment objectives as the Funds, be compared to the same indices as the Funds, or otherwise hold, purchase, or sell securities that are eligible to be held, purchased, or sold by the Funds.

Knowledge of the Timing and Size of Fund Trades: A potential conflict of interest may arise as a result of the portfolio managers' day-to-day management of the Funds. The portfolio managers know the size and timing of trades for the Funds and the Other Accounts, and may be able to predict the market impact of Fund trades. It is theoretically possible that the portfolio managers could use this information to the advantage of Other Accounts they manage and to the possible detriment of the Funds, or vice versa.

Investment Opportunities: The Advisor provides investment supervisory services for a number of investment products that have varying investment guidelines. The same portfolio management team works across all investment products. Differences in the compensation structures of the Advisor's investment products may give rise to a conflict of interest by creating an incentive for the Advisor to allocate the investment opportunities it believes might be the most profitable to the client accounts where it might benefit the most from the investment gains.

ADMINISTRATOR, FUND ACCOUNTANT AND TRANSFER AGENT. Ultimus Fund Solutions, LLC ("Ultimus"), 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246, serves as the Administrator, Fund Accountant and Transfer Agent to the Funds pursuant to an Administration Agreement, a Fund Accounting Agreement and a Transfer Agent and Shareholder Services Agreement (the "Service Agreements").

As Administrator, Ultimus assists in supervising all operations of the Funds (other than those performed by the Advisor under the Investment Advisory Agreements). Ultimus has agreed to perform or arrange for the performance

of the following services (under the Service Agreements, Ultimus may delegate all or any part of its responsibilities thereunder):

- prepare and assemble reports required to be sent to the Funds' shareholders and arrange for the printing and dissemination of such reports;
- assemble reports required to be filed with the SEC and file such completed reports with the SEC;
- arrange for the dissemination to shareholders of the Funds' proxy materials and oversee the tabulation of proxies;
- file the Funds' federal income and excise tax returns and the Funds' state and local tax returns;
- assist in monitoring compliance of the Funds' operations with the 1940 Act and with its investment policies and limitations; and
- make such reports and recommendations to the Board as the Board reasonably requests or deems appropriate.

For providing these administration services, Ultimus receives a monthly fee from each Fund based on its average daily net assets (subject to a minimum fee per month), plus out-of-pocket expenses.

As Fund Accountant, Ultimus maintains the accounting books and records for the Funds, including journals containing an itemized daily record of all purchases and sales of portfolio securities, all receipts and disbursements of cash and all other debits and credits, general and auxiliary ledgers reflecting all asset, liability, reserve, capital, income and expense accounts, including interest accrued and interest received, and other required separate ledger accounts. Ultimus also maintains a monthly trial balance of all ledger accounts; performs certain accounting services for the Funds, including calculation of the net asset value per share, calculation of the dividend and capital gain distributions, reconciles cash movements with the Funds' custodian, verifies and reconciles with the custodian all daily trade activities; provides certain reports; obtains prices used in determining net asset value; and prepares interim balance sheets, statements of income and expense, and statements of changes in net assets for the Funds. For providing these fund accounting services, Ultimus receives from each Fund a base monthly fee plus an asset based fee.

As Transfer Agent, Ultimus performs the following services in connection with the Funds' shareholders: maintains records for each of the Funds' shareholders of record; processes shareholder purchase and redemption orders; processes dividend payments and reinvestments; and assists in the mailing of shareholder reports and proxy solicitation materials. For providing these shareholder services, Ultimus receives from each Fund an annual per account fee, subject to a minimum fee per month.

The Service Agreements, unless otherwise terminated as provided in the Service Agreements, are renewed automatically for successive one-year periods. During the last three fiscal years Ultimus received the following fees from the Funds for its services as Administrator, Fund Accountant and Transfer Agent:

Sector Select RM Fund:

	Administration	Fund Accounting	Transfer Agent
Fiscal Year Ended August 31, 2017	\$30,000	\$37,690	\$24,000
Fiscal Year Ended August 31, 2016	\$29,000	\$36,785	\$24,000
Fiscal Year Ended August 31, 2015	\$26,000	\$33,555	\$24,000

Credit Select RM Fund:

	Administration	Fund Accounting	Transfer Agent
Fiscal Year Ended August 31, 2017	\$84,659	\$44,235	\$26,250
Fiscal Year Ended August 31, 2016	\$59,136	\$38,624	\$24,000
Fiscal Year Ended August 31, 2015	\$47,229	\$32,233	\$22,000

DISTRIBUTOR. Foreside Fund Services, LLC, whose principal location is at Three Canal Plaza, Suite 100, Portland, Maine 04101, is the distributor (also known as principal underwriter) of the shares of the Funds. The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority, Inc. (FINRA).

Under a Distribution Agreement with the Trust, the Distributor acts as the agent of the Trust in connection with the continuous offering of shares of the Funds. The Distributor continually distributes shares of the Funds on a commercially reasonable efforts basis. The Distributor has no obligation to sell any specific quantity of shares of the Funds. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

The Distributor is not compensated by the Funds except as allowed under the Funds' Distribution Plans, but instead will be paid by the Advisor who pays the Distributor for certain distribution related services.

The Distributor may enter into agreements with selected broker-dealers or other financial intermediaries for distribution of shares of the Funds. With respect to certain financial intermediaries and related fund "supermarket" platform arrangements, the Funds and/or the Advisor, rather than the Distributor, typically enter into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, redemption and other requests to the Funds.

CUSTODIAN. U.S. Bank, N.A. (the "Custodian"), 425 Walnut Street, Cincinnati, Ohio 45202, serves as custodian for the Funds' assets. The Custodian acts as the depository for the Funds, safekeeps its portfolio securities, collects all income and other payments with respect to portfolio securities, disburses monies at the Funds' request and maintains records in connection with its duties as Custodian.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM. The Board has selected the firm of Cohen & Company, Ltd. to serve as the independent registered public accounting firm for the Funds for the current fiscal year and to audit the annual financial statements of the Funds, prepare the Funds' federal, state and excise tax returns, and consult with the Funds on matters of accounting and federal and state income taxation. Such firm will audit the financial statements of the Funds at least once each year. A copy of the most recent Annual Report will accompany this SAI whenever a shareholder or a prospective investor requests it.

LEGAL COUNSEL. Kilpatrick Townsend & Stockton LLP, 4208 Six Forks Road, Suite 1400, Raleigh, North Carolina 27609, serves as legal counsel to the Trust and the Funds.

ADDITIONAL PURCHASE AND REDEMPTION INFORMATION

Reference is made to "Investing in the Funds" in the Prospectus for more information concerning how to purchase and redeem shares. The following information supplements the information regarding share purchases and share redemptions in the Prospectus:

PURCHASES. Shares of the Funds are offered and sold on a continuous basis. The purchase price of shares of a Fund is the net asset value next determined after the order is received in proper form (plus any applicable sales charge). Net asset value is normally determined as of the time regular trading closes on the New York Stock Exchange ("NYSE") on days that the NYSE is open for regular trading (currently 4:00 p.m. Eastern time, Monday through Friday, except when the NYSE closes earlier), as described under "Net Asset Value" below. An order received prior to the time regular trading closes on the NYSE will be executed at the price computed on the date of receipt and an order received after the time regular trading closes on the NYSE will be executed at the price computed on the next business day. The Funds' net asset values are not calculated on business holidays when the NYSE is closed. Trading in foreign securities may take place in various foreign markets on certain days when the Funds are not open for business and do not calculate their net asset value.

The Funds reserve the right in their sole discretion: (i) to suspend the offering of their shares; (ii) to reject purchase orders when in the judgment of management such rejection is in the best interest of a Fund and its shareholders; and (iii) to reduce or waive the minimum for initial and subsequent investments in the Advisor's sole discretion (including circumstances where certain economies can be achieved in sales of Fund shares).

Regular Account. The regular account allows for voluntary investments to be made at any time. Available to individuals, custodians, corporations, trusts, estates, corporate retirement plans, and others, investors are free to make additions to and withdrawals from their account. When an investor makes an initial investment in a Fund, a shareholder

account is opened in accordance with the investor's registration instructions. Each time there is a transaction in a shareholder account, such as an additional investment or the reinvestment of a dividend or distribution, the shareholder will receive a confirmation statement showing the current transaction, along with a summary of the status of the account as of the transaction date. As stated in the Prospectus, share certificates are not issued.

Automatic Investment Plan. The automatic investment plan enables shareholders to make regular monthly or quarterly investments in shares through automatic charges to their checking account. With shareholder authorization and bank approval, the Administrator will automatically charge the checking account for the amount specified (\$100 minimum) that will be automatically invested in shares at the public offering price on or about the 15th and/or last business day of the month. The shareholder may change the amount of the investment or discontinue the plan at any time by writing to the Funds.

REDEMPTIONS. The Funds may suspend redemption privileges or postpone the date of payment (i) during any period that the NYSE is closed for other than customary weekend and holiday closings, or when trading on the NYSE is restricted as determined by the SEC; (ii) during any period when an emergency exists as defined by the rules of the SEC as a result of which it is not reasonably practicable for a Fund to dispose of securities owned by it, or to determine fairly the value of its assets; and (iii) for such other periods as the SEC may permit. The Funds may also suspend or postpone the recording of the transfer of shares upon the occurrence of any of the foregoing conditions. Any redemption may be more or less than the shareholder's cost depending on the market value of the securities held by the Funds. No charge is made by the Funds for redemptions other than the possible charge by the Custodian for wiring redemption proceeds or any charges by your broker-dealer or financial institution.

An irrevocable election has been filed pursuant to Rule 18f-1 under the 1940 Act, wherein a Fund must pay redemptions in cash, rather than in kind, to any shareholder of record of the Fund who redeems during any 90-day period, the lesser of (a) \$250,000 or (b) 1% of a Fund's net assets at the beginning of such period. Redemption requests in excess of this limit may be satisfied in cash or in kind at the Fund's election. If a Fund redeems your shares in kind, you will bear the market risks associated with maintaining or selling the securities paid as redemption proceeds. In addition, when you sell the securities, you will pay taxes and brokerage charges associated with selling the securities.

Involuntary Redemptions. In addition to the situations described in the Prospectus under "Redeeming Shares," the Funds may redeem shares involuntarily to reimburse it for any loss sustained by reason of the failure of a shareholder to make full payment for shares purchased by the shareholder, to collect any charge relating to a transaction effected for the benefit of a shareholder that is applicable to Fund shares as provided in the Prospectus from time to time, or to close a shareholder's account if the Funds are unable to verify the shareholder's identity.

Systematic Withdrawal Plan. Shareholders owning shares in the Funds valued at more than \$5,000 may establish a Systematic Withdrawal Plan. A shareholder may receive monthly or quarterly payments, in amounts of not less than \$100 per payment, by authorizing the Funds to redeem the necessary number of shares periodically (each month, or quarterly in the months of March, June, September, and December) in order to make the payments requested. The Funds have the capability of electronically depositing the proceeds of the systematic withdrawal directly to the shareholder's personal bank account (\$5,000 minimum per bank wire). If the shareholder prefers to receive his/her systematic withdrawal proceeds in cash, or if such proceeds are less than the \$5,000 minimum for a bank wire, checks will be made payable to the designated recipient and mailed within seven days of the valuation date. If the designated recipient is other than the registered shareholder, the signature of each shareholder must be guaranteed on the application (see "Redeeming Shares – Signature Guarantees" in the Prospectus). A corporation (or partnership) must also submit a "Corporate Resolution" (or "Certification of Partnership") indicating the names, titles, and required number of signatures authorized to act on its behalf. The application must be signed by a duly authorized officer(s) and the corporate seal affixed. Costs in conjunction with the administration of the plan are borne by the Funds. Shareholders should be aware that such systematic withdrawals may deplete or use up entirely their initial investment and may result in realized long-term or short-term capital gains or losses. The Systematic Withdrawal Plan may be terminated at any time by the Funds upon 60 days' written notice or by a shareholder upon written notice to the Funds. Applications and further details may be obtained by calling the Funds at 1-866-515-4626 or by writing to:

WSTCM Funds

P.O. Box 46707
Cincinnati, Ohio 45246-0707

DISTRIBUTION PLAN

Each Fund has adopted a Distribution Plan pursuant to Rule 12b-1 under the 1940 Act (the “Plans”) for its Investor Shares. See the section entitled “Investing in the Funds – Distribution of Shares” in the Prospectus. As required by Rule 12b-1, the Plans were approved by the Board and separately by a majority of the Independent Trustees who have no direct or indirect financial interest in the operation of the Plans. The Plans provide that the Trust’s Distributor or Treasurer shall provide to the Board, at least quarterly, a written report of the amounts expended pursuant to the Plans and the purposes of such expenditures. The Board will take into account the expenditures for purposes of reviewing operation of the Plans and in connection with its annual consideration of the renewal of the Plans.

Potential benefits of the Plans to the Funds include improved shareholder services and savings to the Funds in certain operating expenses. It is anticipated that the Plans will benefit shareholders because an effective sales program typically is necessary in order for a Fund to reach and maintain a sufficient size to achieve efficiently its investment objectives and to realize economies of scale.

Under the Plans, each Fund may annually expend up to 0.25% of its average daily net assets allocable to Investor Shares to pay for any activity primarily intended to result in the sale of those shares and the servicing of shareholder accounts, provided that the Board has approved the category of expenses for which payment is being made. Such expenditures paid as distribution fees to any person who sells shares may not exceed 0.25% for Investor Shares per annum of a Fund’s average daily net assets. Such expenditures may include, without limitation: (a) the printing and mailing of Fund Prospectuses, statements of additional information, any supplements thereto and shareholder reports for prospective shareholders; (b) those relating to the development, preparation, printing and mailing of advertisements, sales literature and other promotional materials describing and/or relating to the Funds; (c) obtaining information and providing explanations to wholesale and retail distributors of contracts regarding Fund investment objectives and policies and other information about the Funds, including the performance of the Funds; (d) training sales personnel regarding the Funds; and (e) financing any activity that the Distributor determines is primarily intended to result in the sale of Fund shares. The Funds do not participate in any joint distribution activities with other investment companies.

During the fiscal year ended August 31, 2017, the Sector Select RM Fund and the Credit Select RM Fund incurred distribution expenses of \$2,228 and \$137,189, respectively, 100% of which was compensation paid to broker-dealers for the sale or retention of Fund shares.

GENERAL INFORMATION

The Funds may enter into agreements with financial intermediaries pursuant to which the Funds may pay financial intermediaries for non-distribution-related sub-transfer agency, administrative, sub-accounting, and other shareholder services. Payments made pursuant to such agreements are generally based on either (1) a percentage of the average daily net assets of Fund shareholders serviced by a financial intermediary, or (2) the number of Fund shareholders serviced by a financial intermediary. Any payments made pursuant to such agreements may be in addition to, rather than in lieu of, distribution fees a Fund may pay to financial intermediaries pursuant to the Fund’s distribution plan.

Other Payments by the Advisor

The Advisor and/or its affiliates, in their discretion, may make payments from their own resources and not from Fund assets to affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Funds, their service providers or their respective affiliates, as incentives to help market and promote a Fund and/or in recognition of their distribution, marketing, administrative services, and/or processing support.

These additional payments may be made to financial intermediaries that sell Fund shares or provide services to a Fund, the Distributor or shareholders of a Fund through the financial intermediary's retail distribution channel and/or fund supermarkets. Payments may also be made through the financial intermediary's retirement, qualified tuition, fee-based advisory, wrap fee bank trust, or insurance (e.g., individual or group annuity) programs. These payments may include, but are not limited to, placing the Fund in a financial intermediary's retail distribution channel or on a preferred or recommended fund list; providing business or shareholder financial planning assistance; educating financial intermediary personnel about the Fund; providing access to sales and management representatives of the financial intermediary; promoting sales of Fund shares; providing marketing and educational support; maintaining share balances and/or for sub-accounting, administrative or shareholder transaction processing services. A financial intermediary may perform the services itself or may arrange with a third party to perform the services.

The Advisor and/or its affiliates may also make payments from their own resources to financial intermediaries for costs associated with the purchase of products or services used in connection with sales and marketing, participation in and/or presentation at conferences or seminars, sales or training programs, client and investor entertainment and other sponsored events. The costs and expenses associated with these efforts may include travel, lodging, sponsorship at educational seminars and conferences, entertainment and meals to the extent permitted by law.

Revenue sharing payments may be negotiated based on a variety of factors, including the level of sales, the amount of Fund assets attributable to investments in the Fund by financial intermediaries' customers, a flat fee or other measures as determined from time to time by the Advisor and/or its affiliates. A significant purpose of these payments is to increase the sales of Fund shares, which in turn may benefit the Advisor through increased fees as Fund assets grow.

Investors should understand that some financial intermediaries may also charge their clients fees in connection with purchases of shares or the provision of shareholder services.

SPECIAL SHAREHOLDER SERVICES

The Funds offer the following special shareholder services:

TRANSFER OF REGISTRATION. To transfer shares to another owner, send a written request to WSTCM Funds, c/o Ultimus Fund Solutions, LLC, P.O. Box 46707, Cincinnati, Ohio 45246-0707. Your request should include the following: (i) the Fund(s) name and existing account registration; (ii) signature(s) of the registered owner(s) exactly as the signature(s) appear(s) on the account registration; (iii) the new account registration, address, social security or taxpayer identification number, and how dividends and capital gains are to be distributed; (iv) Medallion signature guarantees (See the heading "Redeeming Shares – Signature Guarantees" in the Prospectus); and (v) any additional documents that are required for transfer by corporations, administrators, executors, trustees, guardians, etc. If you have any questions about transferring shares, call or write the Funds.

EMPLOYEES AND AFFILIATES OF THE FUNDS. The Funds have adopted initial investment minimums for the purpose of reducing the cost to the Funds (and consequently to the shareholders) of communicating with and servicing their shareholders. In keeping with this purpose, the Funds may accept accounts with less than the minimum investment from Trustees, officers and employees of the Funds and the Advisor and certain parties related thereto, including clients of the Advisor or any sponsor, officer, committee member thereof, or members of their immediate family. In addition, accounts having the same mailing address may be aggregated for purposes of the minimum investment requirements if such shareholders consent in writing to sharing a single mailing of shareholder reports, proxy statements (but each such shareholder would receive his/her own proxy), and other Fund literature.

DISCLOSURE OF PORTFOLIO HOLDINGS

The Board has adopted policies that govern the disclosure of portfolio holdings. These policies are intended to ensure that such disclosure is in the best interests of the shareholders of the Funds and to address possible conflicts of interest. Under the Trust's policies, the Trust and the Advisor generally will not disclose the Funds' portfolio holdings to a third party unless such information is made available to the public. The policies provide that the Trust and the Advisor may

disclose non-public portfolio holdings information as required by law and under other limited circumstances that are set forth in more detail below.

The Funds will make available to the public a complete schedule of its portfolio holdings, as reported on a fiscal quarter basis. This information is generally available within 60 days of the Funds' fiscal quarter end and will remain available until the next fiscal quarter's portfolio holdings report becomes available. You may obtain a copy of these quarterly portfolio holdings reports by calling the Funds at 1-866-515-4626. The Funds will also file these quarterly portfolio holdings reports with the SEC on Form N-CSR or Form N-Q, as applicable. The Funds' Form N-CSR and Form N-Q are available on the SEC's website at <http://www.sec.gov> and may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. The first and third quarter portfolio holdings reports will be filed with the SEC on Form N-Q and the second and fourth fiscal quarter portfolio holdings reports will be included with the semiannual and annual financial statements, respectively, which are sent to shareholders and filed with the SEC on Form N-CSR.

The Funds and/or the Advisor may, from time to time make additional portfolio holdings information available to the public on their website at www.wstcmfunds.com. Complete lists of the Funds' holdings are generally posted to the website within five to thirty days of the end of the calendar quarter or month and such information will remain available until new information for the next calendar quarter or month is posted. The Funds may also send a portion or all of this information to shareholders of the Funds and to mutual fund analysts and rating and trading entities; provided that the Funds will not send this information to shareholders of the Funds or analysts or rating and/or trading entities until such information is at least 30 days old or until one day after the information has been posted to the Funds' website.

The officers of the Trust and/or the Advisor may share non-public portfolio holdings information with the Funds' service providers that require such information for legitimate business and Fund oversight purposes, such as the Funds' fund accountant and administrator, transfer agent, distributor, custodian, independent registered public accounting firm, and legal counsel as identified in the Funds' Prospectus and SAI, and Graydon Compliance Solutions, LLC, FilePoint Edgar Services and Financial Graphic Services, Inc. (financial edgarizing, typesetting and printing firms). The Funds and/or the Advisor may also provide non-public portfolio holdings information to appropriate regulatory agencies as required by applicable laws and regulations. The Funds' service providers receiving such non-public information are subject to confidentiality obligations requiring such service providers to keep non-public portfolio holdings information confidential. Certain of the service providers have codes of ethics that prohibit trading based on, among other things, non-public portfolio holdings information.

The Funds and/or the Advisor may, from time to time, provide additional portfolio holdings information in the form of quarterly or monthly management letters; provided, however, that the Funds and/or the Advisor will not send such quarterly or monthly management letters to shareholders until such information is either filed with the SEC or publicly disclosed on the Funds' website. In addition, non-public portfolio holdings information and other information regarding the investment activities of the Funds may also be disclosed to rating and ranking organizations for use in connection with their rating or ranking of the Funds. The Funds will be providing non-public portfolio holdings information to the rating or ranking organizations listed in the table that follows. Each disclosure arrangement has been authorized by the Trust and/or the Advisor in accordance with the Funds' disclosure of portfolio holdings policy upon a determination that this disclosure serves a legitimate business purpose of the Funds and that each organization is subject to a duty of confidentiality. Below is a table listing the groups that will be receiving non-public portfolio holdings information along with the types of information received, conditions or restrictions on use, timing of disclosure and any compensation received for providing portfolio information.

Name of Rating or Ranking Group	Information Provided	Timing of Release and Conditions or Restrictions on Use	Receipt of Compensation or other Consideration by the Funds or Affiliated Party
Morningstar, Inc.	CUSIP, description, shares/par, market value	Provided quarterly, with a 60-day lag. No formal conditions or restrictions.	None
Lipper	CUSIP, description,	Provided quarterly, with a 60-day lag. No formal conditions or restrictions. Lipper	None

	shares/par, market value	indicates that it will not trade based on the Funds' portfolio information, and it prohibits its employees from any such trading.	
Bloomberg L.P.	CUSIP, description, shares/par, market value	Provided quarterly, with a 60-day lag. No formal conditions or restrictions. Bloomberg indicates that it requires all employees to sign confidentiality agreements acknowledging all information received during their employment must be used for legitimate business purposes only.	None
S&P Global Inc.	CUSIP, description, shares/par, market value	Provided quarterly, with a 60-day lag. No formal conditions or restrictions. S&P indicates that its employees are required to follow a code of business conduct that prohibits them from using portfolio information for anything other than performing their job responsibilities, and S&P employees must certify annually that they have followed this code of business conduct.	None
Thomson Reuters	CUSIP, description, shares/par, market value	Provided quarterly, with a 60-day lag. No formal conditions or restrictions. Thomson Financial indicates that it requires all employees to sign confidentiality agreements acknowledging that all information received during their employment must be used for legitimate business purposes only.	None
FactSet	CUSIP, description, shares/par, market value	Provided quarterly, with a 60-day lag. No formal conditions or restrictions.	None

The Funds currently do not provide non-public portfolio holdings information to any other third parties. In the future, the Funds may elect to disclose such information to other third parties if the appropriate officers of the Trust determine that the Funds have a legitimate business purpose for doing so and the recipient is subject to a duty of confidentiality. The Advisor, through its officers, is responsible for determining which other third parties have a legitimate business purpose for receiving the Funds' portfolio holdings information.

The Funds' policies regarding disclosure of portfolio holdings are subject to the continuing oversight and direction of the Board. The Advisor and Ultimus are required to report to the Board any known disclosure of the Funds' portfolio holdings to unauthorized third parties. The Funds have not entered (and do not currently intend to enter) into any arrangement providing for the receipt of compensation or other consideration in exchange for the disclosure of non-public portfolio holdings information, other than the benefits that result to the Funds and their shareholders from providing such information, which include the publication of Fund ratings and rankings.

PRICING OF SHARES

The net asset value and the public offering price (net asset value plus any applicable sales charge) of shares of the Funds are normally determined as of the time regular trading closes on the NYSE (currently 4:00 p.m., Eastern time, Monday through Friday, except when the NYSE closes earlier). The Funds' net asset values are not calculated on business holidays or weekends when the NYSE is closed. The NYSE generally recognizes the following holidays: New Year's Day, Martin Luther King, Jr. Day, President's Day, Good Friday, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, and Christmas Day. Any other holiday recognized by the NYSE will be deemed a business holiday on which the net asset value of the Funds will not be calculated.

In computing the net asset value for a Fund, all Fund-specific liabilities incurred or accrued are deducted from the net assets of the Fund. The resulting net assets are divided by the number of shares of the Fund outstanding at the time of the valuation and the result is the net asset value per share.

The pricing and valuation of portfolio securities is determined in good faith in accordance with procedures established by, and under the direction of, the Board. Market values are determined according to generally accepted accounting practices and all laws and regulations that apply. Using methods approved by the Board, the assets of the Funds are generally valued as follows:

- Securities that are listed on a securities exchange or quoted on a national market system are valued at the last quoted sales price at the time the valuation is made. Price information on listed securities is taken from the exchange where the security is primarily traded by the Funds.
- Securities that are listed on an exchange and that are not traded on the valuation date are valued at the most recent closing bid price.
- Securities that are quoted by NASDAQ are valued at the NASDAQ Official Closing Price.
- Unlisted securities for which market quotations are readily available are valued at the latest quoted sales price, if available, at the time of valuation, otherwise, at the latest quoted bid price.
- Options are valued at the mean of the last quoted bid and ask prices at the time of valuation. If no bid quotation is readily available at the time of valuation, the option shall be valued at the mean of the last quoted ask price and \$0.00. In determining bid and ask prices for exchange-listed options, pricing will be based on bid and ask prices as reported on the option's primary exchange. For purposes of determining the primary exchange, the following applies: (i) if the option is traded on the Chicago Board Options Exchange ("CBOE"), the CBOE is considered the primary exchange unless the Advisor identifies a different primary exchange for the option; and (ii) if the option does not trade on the CBOE, the Advisor identifies the primary exchange for the option. Notwithstanding the foregoing, an option may be valued at fair value when (i) the option does not trade on the valuation date; or (ii) reliable last quoted bid and/or ask prices as of the time of valuation are not readily available.
- Securities for which no current quotations are readily available are valued at fair value as determined in good faith using methods approved by the Board.
- Futures contracts are generally valued at the last quoted sales price on the applicable valuation date.
- One or more pricing services may be utilized to determine the value of securities held by the Funds. The methods used by independent pricing services and the quality of valuations so established are reviewed by the Advisor and the Funds' administrator under general supervision of the Board.
- Open-end investment companies, not listed on an exchange, including mutual funds and money market funds, are valued at the net asset value reported by such open-ended investment companies.
- Fixed income securities are normally valued on the basis of prices obtained from independent third-party pricing services approved by the Board of Trustees, which are generally determined with consideration given to institutional bid and last sale prices and take into account securities prices, yield, maturity, call features, ratings, institutional sized trading in similar groups of securities and developments related to specific securities.

Securities traded on a foreign stock exchange may be valued based upon the closing price on the principal exchange where the security is traded; however, because the value of securities traded on foreign stock exchanges may be materially affected by events occurring before a Fund's pricing time but after the close of the primary markets or exchanges on which such securities are traded, such securities will typically be priced at their fair value as determined by an independent pricing service approved by the Board of Trustees. As a result, the prices of securities used to calculate a Fund's net asset value may differ from quoted or published prices for the same securities. Values of foreign

securities are translated from the local currency into U.S. dollars using currency exchange rates supplied by an independent pricing quotation service, if available, otherwise based on the mean of the current bid and ask prices of such currency as last quoted by any recognized dealer or major banking institution. Gains or losses between trade and settlement dates resulting from changes in exchange rates between the U.S. dollar and a foreign currency are borne by the Funds. Subject to the provisions of the Trust Instrument, determinations by the Board as to the direct and allocable liabilities and the allocable portion of any general assets with respect to the Funds are conclusive.

ADDITIONAL TAX INFORMATION

The following summarizes certain additional tax considerations generally affecting the Funds and their shareholders that are not described in the Prospectus. No attempt is made to present a detailed explanation of the tax treatment of the Funds or their shareholders. The discussions here and in the Prospectus are not intended as a substitute for careful tax planning and are based on tax laws and regulations that are in effect on the date hereof; such laws and regulations may be changed by legislative, judicial, or administrative action. Investors are advised to consult their tax advisors with specific reference to their own tax situations.

Each of the Funds, and any other series of the Trust, will be treated as a separate corporate entity under the Internal Revenue Code of 1986, as amended (the “Code”) and each Fund has qualified and intends to remain qualified as a regulated investment company under Subchapter M of the Code. In order to so qualify, a Fund must elect to be a regulated investment company or have made such an election for a previous year and must satisfy certain requirements relating to the amount of distributions and source of its income for a taxable year. At least 90% of the gross income of a Fund must be derived from dividends, interest, payments with respect to securities loans, gains from the sale or other disposition of stocks, securities, or foreign currencies, and other income derived with respect to the Fund’s business of investing in such stock, securities, or currencies, and net income derived from an investment in a “qualified publicly traded partnership” as defined in Internal Revenue Code section 851(h). Any income derived by a Fund from a partnership (other than a “qualified publicly traded partnership”) or trust is treated as derived with respect to the Fund’s business of investing in stock, securities, or currencies only to the extent that such income is attributable to items of income that would have been qualifying income if realized by the Fund in the same manner as by the partnership or trust.

A Fund may not qualify as a regulated investment company for any taxable year unless it satisfies certain requirements with respect to the diversification of its investments at the close of each quarter of the taxable year. In general, at least 50% of the value of a Fund’s total assets must be represented by cash, cash items, government securities, securities of other regulated investment companies, and other securities which, with respect to any one issuer, do not represent more than 5% of the total assets of the Fund nor more than 10% of the outstanding voting securities of such issuer. In addition, not more than 25% of the value of a Fund’s total assets may be invested in the securities (other than government securities or the securities of other regulated investment companies) of any one issuer; the securities of two or more issuers (other than securities of another regulated investment company) if the issuers are controlled by the Fund and they are, pursuant to Internal Revenue Service Regulations, engaged in the same or similar or related trades or businesses; or the securities of one or more publicly traded partnerships. The Funds intend to satisfy all requirements on an ongoing basis for continued qualification as a regulated investment company.

If a regulated investment company fails this asset-diversification test, such investment company, in addition to other cure provisions previously permitted, has a 6-month period to correct any failure without incurring a penalty if such failure is “de minimis”. Such cure right is similar to that previously and currently permitted for a REIT.

Similarly, if a regulated investment company fails this asset-diversification test and the failure is not de minimis, a regulated investment company can cure such failure if: (a) the regulated investment company files a description of each asset that causes the investment company to fail the diversification tests; (b) the failure is due to reasonable cause and not willful neglect; and (c) the failure is cured within six months (or such other period specified by the Treasury). In such cases, a tax is imposed on the regulated investment company equal to the greater of: (a) \$50,000 or (b) an amount determined by multiplying the highest rate of tax (currently 35%) by the amount of net income generated during the period of the diversification test failure by the assets that caused the regulated investment company to fail the diversification test.

Under current tax law, qualifying corporate dividends are taxable at long-term capital gains tax rates. The long-term capital gains rate for individual taxpayers is currently at a maximum rate of 20%, with lower rates potentially applicable to taxpayers depending on their income levels. For 2017, individual taxpayers with taxable incomes above

\$418,400 (\$470,700 for married taxpayers filing jointly, \$235,350 for married taxpayers filing separately and \$444,550 for heads of households) are subject to a 20% rate of tax on long-term capital gains and qualified dividends. Taxpayers that are not in the highest tax bracket and are subject to the 25% (or greater) tax bracket on their ordinary income and whose taxable income is less than the above-mentioned thresholds will continue to be subject to a maximum 15% rate of tax on long-term capital gains and qualified dividends. For taxpayers whose ordinary income is generally taxed at less than the 25% rate, the long-term capital gains rate, and rate on qualified dividends will be 0%. These rates may change over time.

Taxable dividends paid by the Funds to corporate shareholders will be taxed at corporate income tax rates. Corporate shareholders may be entitled to a dividends received deduction (“DRD”) for a portion of the dividends paid and designated by the Funds as qualifying for the DRD.

If a Fund designates a dividend as a capital gains distribution, it generally will be taxable to shareholders as long-term capital gains, regardless of how long the shareholders have held their Fund shares or whether the dividend was received in cash or reinvested in additional shares. All taxable dividends paid by the Funds other than those designated as qualified dividend income or capital gains distributions will be taxable as ordinary income to shareholders, whether received in cash or reinvested in additional shares. To the extent the Funds engage in increased portfolio turnover, short-term capital gains may be realized, and any distribution resulting from such gains will be considered ordinary income for federal tax purposes.

Shareholders who hold Fund shares in a tax-deferred account, such as a retirement plan, generally will not have to pay tax on Fund distributions until they receive distributions from their account.

Each series of the Trust, including the Funds, will designate (1) any dividend of qualified dividend income as qualified dividend income; (2) any tax-exempt dividend as an exempt-interest dividend; (3) any distribution of long-term capital gains as a capital gain dividend; and (4) any dividend eligible for the corporate dividends received deduction as such in a written notice provided to shareholders after the close of the Funds’ taxable year. Shareholders should note that, upon the sale or exchange of Fund shares, if the shareholder has not held such shares for at least six months, any loss on the sale or exchange of those shares will be treated as long-term capital loss to the extent of the capital gain dividends received with respect to the shares.

To the extent that a distribution from a Fund is taxable, it is generally included in a shareholder’s gross income for the taxable year in which the shareholder receives the distribution. However, if a Fund declares a dividend in October, November, or December, but pays it in January, it will be taxable to shareholders as if the dividend was received in the year it was declared. Every year, each shareholder will receive a statement detailing the tax status of any Fund distributions for that year.

A Fund’s net realized capital gains from securities transactions will be distributed only after reducing such gains by the amount of any available capital loss carryforwards. A regulated investment company is permitted to carry forward net capital losses indefinitely and may allow losses to retain their original character (as short or as long-term).

Certain individuals, estates and trusts must pay a 3.8% Medicare surtax on “net investment income” including, among other things, dividends and proceeds of sale in respect of securities like the shares, subject to certain exceptions. Prospective investors should consult with their own tax advisors regarding the effect, if any, of this surtax on their ownership and disposition of the shares.

A 4% nondeductible excise tax is imposed on regulated investment companies that fail to currently distribute an amount equal to specified percentages of their ordinary taxable income and capital gain net income (excess of capital gains over capital losses). Each Fund intends to make sufficient distributions or deemed distributions of its ordinary taxable income and any capital gain net income prior to the end of each calendar year to avoid liability for this excise tax.

If for any taxable year a Fund does not qualify for the special federal income tax treatment afforded regulated investment companies, all of its taxable income will be subject to federal income tax at regular corporate rates (without any deduction for distributions to its shareholders). In such event, dividend distributions (whether or not derived from interest on tax-exempt securities) would be taxable as qualified dividends to individual shareholders to the extent of a Fund’s current and accumulated earnings and profits, and would be eligible for the DRD for corporations, provided in each case that

certain holding period and other requirements are met.

In general, a shareholder who sells or redeems shares will realize a capital gain or loss, which will be long-term or short-term depending upon the shareholder's holding period for Fund shares. An exchange of shares may be treated as a sale and any gain may be subject to tax.

The Funds will be required in certain cases to withhold and remit to the U.S. Treasury a percentage equal to the fourth lowest tax rate for unmarried individuals (presently 28%) of taxable dividends or of gross proceeds realized upon sale paid to shareholders who have failed to provide a correct taxpayer identification number in the manner required, who are subject to withholding by the Internal Revenue Service for failure to include properly on their return payments of taxable interest or dividends, or who have failed to certify to the Funds that they are not subject to backup withholding when required to do so, or that they are "exempt recipients."

Depending upon the extent of a Fund's activities in states and localities in which its offices are maintained, in which its agents or independent contractors are located, or in which it is otherwise deemed to be conducting business, the Fund may be subject to the tax laws of such states or localities. In addition, in those states and localities that have income tax laws, the treatment of a Fund and its shareholders under such laws may differ from their treatment under federal income tax laws.

Dividends paid by the Funds to non-U.S. shareholders may be subject to U.S. withholding tax at the rate of 30% unless reduced by treaty (and the shareholder files a valid Internal Revenue Service Form W-8BEN, or other applicable form, with the Funds certifying foreign status and treaty eligibility) or the non-U.S. shareholder files an Internal Revenue Service Form W-8ECI, or other applicable form, with the Funds certifying that the investment to which the distribution relates is effectively connected to a U.S. trade or business of such non-U.S. shareholder (and, if certain tax treaties apply, is attributable to a U.S. permanent establishment maintained by such non-U.S. shareholder). The Funds may elect not to withhold the applicable withholding tax on any distribution representing a capital gain dividend to a non-U.S. shareholder. Special rules may apply to non-U.S. shareholders with respect to the information reporting requirements and withholding taxes and non-U.S. shareholders should consult their tax advisors with respect to the application of such reporting requirements and withholding taxes.

Under sections 1471 through 1474 to the Code, also known as the "Foreign Account Tax Compliance Act of 2009" or "FATCA," foreign financial institutions (which include hedge funds, private equity funds, mutual funds, securitization vehicles and any other investment vehicles regardless of their size) and other foreign entities must comply with certain information reporting rules with respect to their U.S. account holders and investors or be subject to a withholding tax on U.S. source payments made to them. A foreign financial institution or other foreign entity that does not comply with the FATCA reporting requirements will be subject to a 30% withholding tax with respect to any "withholdable payments" other than such payments that are made on "obligations" that were outstanding on March 18, 2012. For this purpose, withholdable payments are U.S. source payments otherwise subject to nonresident withholding tax and also include the gross proceeds from the sale of any equity or debt instruments of U.S. issuers. The FATCA withholding tax applies regardless of whether the payment would otherwise be exempt from U.S. tax (e.g., payments of interest under the portfolio interest exemption or income from the sale of capital assets). The FATCA provisions also impose certain additional information reporting requirements and increased related penalties for U.S. persons.

FATCA withholding does not apply to withholdable payments made directly to foreign governments, international organizations, foreign central banks and individuals. The Treasury Department is authorized to provide additional exceptions to the application of the FATCA provisions. Prospective investors should consult with their own tax advisors regarding the application of FATCA to their particular circumstances.

Mutual funds are required to report to the IRS and furnish to fund shareholders the cost basis information for fund shares purchased and/or sold on or after January 1, 2012. In addition to the requirement to report the gross proceeds from the sale of Fund shares, the Funds are also required to report the cost basis information for such shares and indicate whether these shares had a short-term or long-term holding period. In the absence of an election by a shareholder to elect from available IRS accepted cost basis methods, the Funds will use a default cost basis method. The cost basis method elected or applied may not be changed after the settlement date of a sale of Fund shares. Fund shareholders should consult with

their tax advisers concerning the most desirable IRS-accepted cost basis method for their tax situation and to obtain more information about how the cost basis reporting law applies to them.

The Funds will send shareholders information each year on the tax status of dividends and distributions. A dividend or capital gains distribution paid shortly after shares have been purchased, although in effect a return of investment, is subject to federal income taxation. Dividends from net investment income, along with capital gains, will be taxable to shareholders, whether received in cash or Fund shares and no matter how long the shareholder has held Fund shares, even if they reduce the net asset value of shares below the shareholder's cost and thus, in effect, result in a return of a part of the shareholder's investment.

ADDITIONAL INFORMATION ON PERFORMANCE

From time to time, the total return of the Funds may be quoted in advertisements, sales literature, shareholder reports, or other communications to shareholders. The "average annual total return" of a Fund refers to the average annual compounded rate of return over the stated period that would equate an initial investment in the Fund at the beginning of the period to its ending redeemable value, assuming reinvestment of all dividends and distributions and deduction of all recurring charges. Performance figures will be given for the most recent one, five and ten year periods, or for the life of a Fund if it has not been in existence for any such periods. When considering "average annual total return" figures for periods longer than one year, it is important to note that a Fund's annual total return for any given year might have been greater or less than its average for the entire period. "Cumulative total return" represents the total change in value of an investment in a Fund for a specified period (again reflecting changes in Fund share prices and assuming reinvestment of Fund distributions).

The following is a brief description of how performance is calculated. Quotations of average annual total return for the Funds will be expressed in terms of the average annual compounded rate of return of a hypothetical investment in a Fund over periods of one year, five years and ten years or since inception (as applicable). These are the average annual total rates of return that would equate the initial amount invested to the ending redeemable value.

The average annual total return (before taxes) is calculated by finding the average annual compounded rates of return over the applicable period that would equate the initial amount invested to the ending value using the following formula:

$$P(1+T)^n = ERV$$

Where P = a hypothetical initial payment of \$1,000
T = average annual total return
n = number of years
ERV = ending redeemable value of a hypothetical initial payment of \$1,000

The average annual total return (after taxes on distributions) is calculated by finding the average annual compounded rates of return over the applicable period that would equate the initial amount invested to the ending value using the following formula:

$$P(1+T)^n = ATV_D$$

Where P = a hypothetical initial payment of \$1,000
T = average annual total return (after taxes on distributions)
n = number of years
 ATV_D = ending redeemable value of a hypothetical initial payment of \$1,000, after taxes on fund distributions but not after taxes on redemption

The average annual total return (after taxes on distributions and sale of Fund shares) is calculated by finding the average annual compounded rates of return over the applicable period that would equate the initial amount invested to the ending value using the following formula:

$$P(1+T)^n = ATV_{DR}$$

Where P = a hypothetical initial payment of \$1,000
 T = average annual total return (after taxes on distributions and redemptions)
 n = number of years
 ATV_{DR} = ending redeemable value of a hypothetical initial payment of \$1,000, after taxes on fund distributions and redemption

The calculations of average annual total return and cumulative total return assume an initial \$1,000 investment and reinvestment of all dividends and capital gains distributions on the reinvestment dates during the period. The ending redeemable value is determined by assuming complete redemption of the hypothetical investment and the deduction of all nonrecurring charges at the end of the period covered by the computations. These performance quotations should not be considered as representative of a Fund's future performance. The table below shows the Funds' average annual total returns for the periods ended August 31, 2017:

Fund	One Year	Since Inception (December 16, 2013)
Sector Select RM Fund - Investor shares	4.69%	3.27%
Sector Select RM Fund - Institutional shares	4.96%	3.51%
	One Year	Since Inception (September 30, 2014)
Credit Select RM Fund - Investor shares	4.26%	4.34%
Credit Select RM Fund - Institutional shares	4.40%	4.54%

The Funds' performance may be compared in advertisements, sales literature, shareholder reports, and other communications to the performance of other mutual funds having similar objectives or to standardized indices or other measures of investment performance. Comparative performance may also be expressed by reference to a ranking prepared by a mutual fund monitoring service or by one or more newspapers, newsletters, or financial periodicals. The Funds may also occasionally cite statistics to reflect its volatility and risk. The Funds may also compare their performance to other published reports of the performance of unmanaged portfolios of companies. The performance of such unmanaged portfolios generally does not reflect the effects of dividends or dividend reinvestment. The Funds may also compare their performance to other reports of the performance of managed accounts of the Advisor. Of course, there can be no assurance the Funds will experience the same results. Performance comparisons may be useful to investors who wish to compare a Fund's past performance to that of other mutual funds and investment products. Of course, past performance is not a guarantee of future results.

The Funds' performance fluctuates on a daily basis largely because net earnings and net asset value per share fluctuate daily. Both net earnings and net asset value are factors in the computation of total return as described above.

As indicated, from time to time, the Funds may advertise their performance compared to similar funds or portfolios using certain indices, reporting services, and financial publications. These may include the following:

- **Lipper** ranks funds in various fund categories by making comparative calculations using total return. Total return assumes the reinvestment of all capital gains distributions and income dividends and takes into account any change in net asset value over a specific period of time.
- **Morningstar, Inc.**, an independent rating service, rates mutual funds of all types according to their risk-adjusted returns. The maximum rating is five stars, and ratings are effective for one month.

Investors may use such indices in addition to the Funds' Prospectus to obtain a more complete view of the Funds' performance before investing. Of course, when comparing a Fund's performance to any index, factors such as composition of the index and prevailing market conditions should be considered in assessing the significance of such comparisons. When comparing funds using reporting services or total return, investors should take into consideration any relevant differences in funds such as permitted portfolio compositions and methods used to value portfolio securities and to compute offering price. Advertisements and other sales literature for the Funds may quote total returns that are calculated on non-standardized base periods. The total returns represent the historic change in the value of an investment in the Funds, assuming reinvestment of dividends, over a specified period of time.

From time to time, the Funds may include in advertisements and other communications charts and illustrations relating to inflation and the effects of inflation on the dollar, including the purchasing power of the dollar at various rates of inflation. The Funds may also disclose from time to time information about its portfolio allocation and holdings at a particular date. The Funds may also depict the historical performance of the securities in which the Funds may invest over periods reflecting a variety of market or economic conditions either alone or in comparison with alternative investments, performance indices of those investments, or economic indicators. The Funds may also include in advertisements and in materials furnished to present and prospective shareholders statements or illustrations relating to the appropriateness of types of securities and/or mutual funds that may be employed to meet specific financial goals, such as saving for retirement, children's education, or other future needs.

FINANCIAL STATEMENTS

The Funds' audited financial statements for the fiscal year ended August 31, 2017, including the Financial Highlights appearing in the Prospectus, are incorporated by reference and made a part of this document.

APPENDIX A – DESCRIPTION OF RATINGS

The Funds may acquire from time to time fixed income or debt securities as described in the Prospectus and this SAI. The Funds are not restricted with respect to yield, maturity, or credit quality of any fixed income or debt securities, so that the Funds may purchase fixed income or debt securities that are of high quality “investment grade” (“Investment-Grade Debt Securities”) or of lower quality with significant risk characteristics (e.g., “junk bonds”). The various ratings used by nationally recognized statistical rating organizations (each an “NRSRO”) are described below.

A rating by an NRSRO represents the organization’s opinion as to the credit quality of the security being rated. However, the ratings are general and are not absolute standards of quality or guarantees as to the creditworthiness of an issuer. Consequently, the Advisor believes that the quality of Investment-Grade Debt Securities in which the Funds may invest should be continuously reviewed and that individual analysts give different weightings to the various factors involved in credit analysis. A rating is not a recommendation to purchase, sell, or hold a security, because it does not take into account market value or suitability for a particular investor. When a security has received a rating from more than one NRSRO, each rating is evaluated independently. Ratings are based on current information furnished by the issuer or obtained by the NRSROs from other sources that they consider reliable. Ratings may be changed, suspended, or withdrawn as a result of changes in or unavailability of such information, or for other reasons.

S&P® GLOBAL RATINGS. The following summarizes the highest four ratings used by S&P Global Ratings (“S&P”), for bonds which are deemed to be Investment-Grade Debt Securities by the Advisor:

AAA – An obligation rated “AAA” has the highest rating assigned by S&P. The obligor’s capacity to meet its financial commitment on the obligation is extremely strong.

AA – An obligation rated “AA” differs from AAA obligations only to a small degree. The obligor’s capacity to meet its financial commitment on the obligation is very strong.

A – An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitment on the obligation is still strong.

BBB – An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor’s capacity to meet its financial commitment on the obligation.

Bonds rated “BB,” “B,” “CCC,” “CC” and “C” are not considered by the Advisor to be Investment-Grade Debt Securities and are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations may likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major risk exposures to adverse conditions.

The ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) designation to show relative standing within the major rating categories.

Short-term obligations rated “A-1” by S&P indicates that the obligor’s capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus (+) designation. This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong. A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitment on the obligation is satisfactory.

The rating SP-1 is the highest rating assigned by S&P to short term notes and indicates strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation. The rating SP-2 indicates a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes. The rating SP-3 indicates a speculative capacity to pay principal and interest.

MOODY'S INVESTORS SERVICE, INC. Moody's Investors Service, Inc. ("Moody's") long-term ratings are opinions of the relative credit risk of financial obligations with an original maturity of one year or more. They address the possibility that a financial obligation will not be honored as promised. Such ratings use Moody's Global Scale and reflect both the likelihood of default and any financial loss suffered in the event of default. The highest four ratings are deemed to be Investment-Grade Securities by the Advisor:

Aaa –Obligations rated Aaa are judged to be of the highest quality, with minimal credit risk.

Aa –Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A –Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Baa –Obligations rated Baa are subject to moderate credit risk. They are considered medium-grade and as such may possess certain speculative characteristics.

Obligations which are rated Ba, B, Caa, Ca or C by Moody's are not considered "Investment-Grade Debt Securities" by the Advisor. Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk. Obligations rated B are considered speculative and are subject to high credit risk. Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Short-Term Ratings

Moody's short-term ratings are assigned to obligations with an original maturity of thirteen months, or less and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default..

Moody's employs the following designations to indicate the relative repayment ability of rated issuers:

P-1 – Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2 – Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3 – Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

NP – Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

US Municipal Short-Term Debt and Demand Obligation Ratings

Short-Term Obligation Ratings – The Municipal Investment Grade (MIG) scale is used to rate US municipal bond anticipation notes of up to three years maturity. Municipal notes on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer's long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels — MIG 1 through MIG 3- while speculative grade short-term obligations are designated SG.

MIG 1 – This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2 – This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3 – This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG – This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Demand Obligation Ratings – In the case of variable rate demand obligations (VRDOs), a two-component rating is assigned; a long or short-term debt rating and a demand obligation rating. The first element represents Moody’s evaluation of risk associated with scheduled principal and interest payments. The second element represents Moody’s evaluation of risk associated with the ability to receive purchase price upon demand (“demand feature”). The second element uses a rating from a variation of the MIG scale, called the Variable Municipal Investment Grade (VMIG) scale. VMIG ratings of demand obligations with unconditional liquidity support are mapped from the short-term debt rating (or counterparty assessment) of the support provider, or the underlying obligor in the absence of third party liquidity support, with VMIG 1 corresponding to P-1, VMIG 2 to P-2, VMIG 3 to P-3 and SG to not prime.

VMIG 1 – This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 2 – This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 3 – This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

SG – This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

FITCH RATINGS. The following summarizes the highest four ratings used by Fitch Ratings, Inc. (“Fitch”):

Long-Term Ratings

AAA – Highest credit quality. “AAA” ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA – Very high credit quality. “AA” ratings denote an expectation of low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A – High credit quality. “A” ratings denote an expectation of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB – Good credit quality. “BBB” ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity. This is the lowest investment grade category.

Long-term securities rated below BBB by Fitch are not considered by the Advisor to be investment-grade securities. Securities rated BB and B are regarded as speculative with regard to a possible default risk developing. BB is considered speculative and B is considered highly speculative. Securities rated CCC, CC and C are regarded as a high credit risk. A rating CCC indicates a substantial credit risk, while a rating CC indicates very high levels of credit risk, and a rating C signals near default. “RD” ratings indicate an issuer that in Fitch’s opinion has experienced an uncured payment default on a bond, loan or other material financial obligations, but has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, and has not otherwise ceased

operating. “D” ratings indicate an issuer that in Fitch’s opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal wind-up procedure, or has otherwise ceased business.

Short-Term Ratings

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-term ratings are assigned to obligations whose initial maturity is viewed as “short term” based on market convention. Typically, this means up to 13 months for corporate, sovereign, and structured obligations and up to 36 months for obligations in U.S. public finance markets.

F1 – Highest short-term credit quality. The rating F1 indicates the strongest capacity for timely payment of financial commitments; may have an added (+) to denote any exceptionally strong credit feature.

F2 – Good short-term credit quality. The rating F2 indicates a good intrinsic capacity for timely payment of financial commitments.

F3 – Fair short term credit quality. The rating F3 indicates the intrinsic capacity for timely payment of financial commitments is adequate.

B – Speculative short-term credit quality. The rating B indicates minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near-term adverse changes in financial and economic conditions.

Short-term rates B, C, RD and D by Fitch are considered by the Advisor to be below investment-grade securities. Short-term securities rated C have a high short-term default risk and securities rated D indicate a broad-based default event for an entity or the default of a short-term obligation.

(+) or (-) suffixes may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to long-term ratings “AAA” category or to the categories below “B.” The suffix “NR” indicates that Fitch does not publicly rate the issuer or issue in question.

While the foregoing descriptions of the ratings systems used by the Advisor distinguishes between “Investment-Grade Debt Securities” and more speculative debt securities, as stated above the Funds are not limited with respect to the yield, maturity or credit quality of the debt securities in which they invest. Accordingly, the Funds’ portfolios may be invested in Investment-Grade Debt Securities or debt securities that are not Investment-Grade Debt Securities in any proportion.

APPENDIX B – PROXY VOTING POLICIES

The following proxy voting policies are provided:

- (1) the Trust's Proxy Voting and Disclosure Policy and
- (2) the Advisor's Proxy Voting and Disclosure Policy, including a detailed description of the Advisor's specific proxy voting guidelines.

WST INVESTMENT TRUST

PROXY VOTING AND DISCLOSURE POLICY

I. Introduction

The Securities and Exchange Commission (“SEC”) has adopted rules and form requirements under the Securities Act of 1933, the Securities Exchange Act of 1934, and the Investment Company Act of 1940 (“Investment Company Act”) to require registered management investment companies to provide disclosure about how they vote proxies for their portfolio securities (collectively, the rule and form amendments are referred to herein as the “IC Amendments”).

The IC Amendments require that each series of shares of the WST Investment Trust (“Trust”) listed on Exhibit A, attached hereto, (individually a “Fund” and collectively “Fund”), disclose the policies and procedures used to determine how to vote proxies for portfolio securities. The IC Amendments also require the Fund to file with the SEC and to make available to their shareholders the specific proxy votes cast for portfolio securities.

This Proxy Voting and Disclosure Policy (“Policy”) is designed to ensure that the Fund comply with the requirements of the IC Amendments, and otherwise fulfills their obligations with respect to proxy voting, disclosure, and recordkeeping. The overall goal is to ensure that the Fund’s proxy voting is managed in an effort to act in the best interests of its shareholders. While decisions about how to vote must be determined on a case-by-case basis, proxy voting decisions will be made considering these guidelines and following the procedures recited herein.

II. Specific Proxy Voting Policies and Procedures

A. General

The Trust’s Board of Trustees (“Board”) believes that the voting of proxies is an important part of portfolio management as it represents an opportunity for shareholders to make their voices heard and to influence the direction of a company. The Trust and the Fund are committed to voting corporate proxies in the manner that best serves the interests of the Fund’s shareholders.

B. Delegation to Fund’s Advisor

The Board believes that Wilbanks, Smith & Thomas Asset Management, LLC, d/b/a WST Capital Management (the “Advisor”), as the Fund’s investment adviser, is in the best position to make individual voting decisions for each Fund consistent with this Policy. Therefore, subject to the oversight of the Board, the Advisor is hereby delegated the following duties:

- (1) to make the proxy voting decisions for each Fund; and
- (2) to assist each Fund in disclosing the Fund’s proxy voting record as required by Rule 30b1-4 under the Investment Company Act, including providing the following information for each matter with respect to which the Fund was entitled to vote: (a) information identifying the matter voted on; (b) whether the matter was proposed by the issuer or by a security holder; (c) whether and how the Fund cast its vote; and (d) whether the Fund cast its vote for or against management.

The Board, including a majority of the independent trustees of the Board, shall approve the Advisor’s Proxy Voting and Disclosure Policy (the “Advisor’s Voting Policy”) as it relates to the Fund. The Board shall also approve any material changes to the Advisor’s Voting Policy no later than four (4) months after adoption by the Advisor.

C. Conflicts

In cases where a matter with respect to which the Fund is entitled to vote presents a conflict between the interest of the Fund’s shareholders, on the one hand, and those of the Advisor, principal underwriter, or an affiliated

person of the Fund, its investment adviser or principal underwriter, on the other hand, the Fund shall always vote in the best interest of the Fund's shareholders. For purposes of this Policy a vote shall be considered in the best interest of the Fund's shareholder (i) when a vote is cast consistent with a specific voting policy as set forth in the Advisor's Voting Policy, provided such specific voting policy was approved by the Board or (ii) when a vote is cast consistent with the decision of the Trust's Proxy Voting Committee (as defined below). In addition, provided the Advisor is not affiliated with a Fund's principal underwriter or an affiliated person of the principal underwriter and neither the Fund's principal underwriter nor an affiliated person of the principal underwriter has influenced the Advisor with respect to a matter to which the Fund is entitled to vote, a vote by the Advisor shall not be considered a conflict between the Fund's shareholders and the Fund's principal underwriter or affiliated person of the principal underwriter.

III. Fund Disclosure

A. Disclosure of Fund Policies and Procedures With Respect to Voting Proxies Relating to Portfolio Securities

The Fund will notify its shareholders in the SAI and the Fund's shareholder reports that a description of this Policy is available upon request, without charge, by calling a specified toll-free telephone number, by reviewing the Fund's website, if applicable, and by reviewing filings available on the SEC's website at <http://www.sec.gov>. The Fund will send this description of the Fund's Policy within three business days of receipt of any shareholder request, by first-class mail or other means designed to ensure equally prompt delivery.

B. Disclosure of the Fund's Complete Proxy Voting Record

In accordance with Rule 30b1-4 of the Investment Company Act, the Fund shall disclose to its shareholders on Form N-PX the Fund's complete proxy voting record for the twelve month period ended June 30 by no later than August 31 of each year.

Each Fund shall disclose the following information on Form N-PX for each matter relating to a portfolio security considered at any shareholder meeting held during the period covered by the report and with respect to which to the Fund was entitled to vote:

- (1) The name of the issuer of the portfolio security;
- (2) The exchange ticker symbol of the portfolio security (if available through reasonably practicable means);
- (3) The Council on Uniform Security Identification Procedures ("CUSIP") number for the portfolio security (if available through reasonably practicable means);
- (4) The shareholder meeting date;
- (5) A brief identification of the matter voted on;
- (6) Whether the matter was proposed by the issuer or by a security holder;
- (7) Whether the Fund cast its vote on the matter;
- (8) How the Fund cast its vote (e.g., for or against proposal, or abstain; for or withhold regarding election of directors); and
- (9) Whether the Fund cast its vote for or against management.

Each Fund shall make its proxy voting record available to shareholders either upon request or by making available an electronic version on or through the Fund's website, if applicable. If the Fund discloses its proxy voting record on or through its website, the Fund shall post the information disclosed in the Fund's most recently filed report on Form N-PX on the website beginning the same day it files such information with the SEC.

Each Fund shall also include in its annual reports, semi-annual reports and SAI a statement that information regarding how the Fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 is available (1) without charge upon request, by calling a specified toll-free (or collect) telephone number, or (if applicable) on or through the Fund's website at a specified Internet address; and (2)

on the SEC's website. If the Fund discloses that its proxy voting record is available by calling a toll-free (or collect) telephone number, it shall send the information disclosed in the Fund's most recently filed report on Form N-PX within three business days of receipt of a request for this information, by first-class mail or other means designed to ensure equally prompt delivery.

IV. Recordkeeping

The Trust shall keep the following records for a period of at least five years, the first two in an easily accessible place:

- (i) A copy of this Policy;
- (ii) Proxy Statements received regarding the Fund's securities;
- (iii) Records of votes cast on behalf of each Fund; and
- (iv) A record of each shareholder request for proxy voting information and the Fund's response, including the date of the request, the name of the shareholder, and the date of the response.

The foregoing records may be kept as part of the Advisor's records.

A Fund may rely on proxy statements filed on the SEC EDGAR system instead of keeping its own copies, and may rely on proxy statements and records of proxy votes cast by the Advisor that are maintained with a third party such as a proxy voting service, provided that an undertaking is obtained from the third party to provide a copy of the documents promptly upon request.

V. Proxy Voting Committee

A. General

The Proxy Voting Committee of the Trust shall be composed entirely of independent trustees of the Board and may be comprised of one or more such independent trustees as the Board may, from time to time, decide. The purpose of the Proxy Voting Committee shall be to determine how a Fund should cast its vote, if called upon by the Board or the Advisor, when a matter with respect to which the Fund is entitled to vote presents a conflict between the interest of the Fund's shareholders, on the one hand, and those of the Advisor, principal underwriter, or an affiliated person of the Fund, its investment adviser or principal underwriter, on the other hand.

B. Powers and Methods of Operation

The Proxy Voting Committee shall have all the powers necessary to fulfill its purpose as set forth above and such other powers and perform such other duties as the Board may, from time to time, grant and/or assign the Proxy Voting Committee. The Proxy Voting Committee shall meet at such times and places as the Proxy Voting Committee or the Board may, from time to time, determine. The act of a majority of the members of the Proxy Voting Committee in person, by telephone conference or by consent in writing without a meeting shall be the act of the Proxy Voting Committee. The Proxy Voting Committee shall have the authority to utilize Trust counsel at the expense of the Trust if necessary. The Proxy Voting Committee shall prepare minutes of each meeting and keep such minutes with the Trust's records. The Proxy Voting Committee shall review this Policy and recommend any changes to the Board as it deems necessary or advisable.

VI. Other

This Policy may be amended, from time to time, as determined by the Board.

EXHIBIT A

Series of the WST Investment Trust:

1. WSTCM Sector Select RM Fund
2. WSTCM Credit Select RM Fund

WILBANKS, SMITH & THOMAS ASSET MANAGEMENT, LLC

PROXY VOTING AND DISCLOSURE POLICY

Proxy Voting Policy

Wilbanks, Smith & Thomas Asset Management, LLC (“WST”) does not have the authority and **will not** be responsible for voting proxies for its clients **except** where we are required to vote (e.g.; by the plan documents governing ERISA accounts) or have specifically agreed to vote. In the instance where we are required to vote, proxies will be voted after all appropriate information has been collected and reviewed, in the best financial interest of the clients which WST generally believes to be consistent with management’s recommendations.

Predetermined Guidelines: Routine and Financial or Corporate Governance Matters

WST adheres to certain predetermined voting guidelines and required voting will be done on a case-by-case basis, deemed by WST’s Investment Committee to be in the best financial interest of its clients. Certain financial and corporate governance issues may need additional consideration, as they may involve issues such as hostile takeovers and mergers. WST will typically **vote with management** on the following matters and proposals:

- | | | |
|--|---|---|
| <input type="checkbox"/> Allot Securities | <input type="checkbox"/> Cumulative Voting | <input type="checkbox"/> Amend Articles/By Law/Charter – Organization Related |
| <input type="checkbox"/> Date / Place of Annual Meeting | <input type="checkbox"/> Amend Investment Policy | <input type="checkbox"/> Amend Investment Policy |
| <input type="checkbox"/> Declaration of Final Dividend Payment | <input type="checkbox"/> Appoint Auditors and Approve Remuneration | <input type="checkbox"/> Appointment of Independent Auditors |
| <input type="checkbox"/> Dividend | <input type="checkbox"/> Approve / Amend Investment Advisory Agreements | <input type="checkbox"/> Approve Authorized Common Stock Increase |
| <input type="checkbox"/> Election of Directors | <input type="checkbox"/> Approve Common Stock Par Value Change | <input type="checkbox"/> Approve Merger Agreement |
| <input type="checkbox"/> Increase / Decrease Share Capital | <input type="checkbox"/> Approve Reorganization Plan | <input type="checkbox"/> Approve Reverse Stock Split |
| <input type="checkbox"/> Indemnification / Liability | <input type="checkbox"/> Authorize Directors to Increase / Decrease Share Capital | <input type="checkbox"/> Authorize Directors to Repurchase Shares |
| <input type="checkbox"/> Miscellaneous Corporate Actions – Global | <input type="checkbox"/> Change Stock Exchange Listing | <input type="checkbox"/> Confidential Voting |
| <input type="checkbox"/> Miscellaneous Corporate Governance | | |
| <input type="checkbox"/> Par Value Change | | |
| <input type="checkbox"/> Ratification of Director’s actions on routine matters | | |
| <input type="checkbox"/> Receive Consolidated Financial Statements | | |
| <input type="checkbox"/> Stock Issuance | | |
| <input type="checkbox"/> Transact Other Business | | |

WST will **not** vote with management on any recommendations that the role of CEO and Chairman be combined. WST feels these roles should be kept separate.

Guidelines: Social Conscience/Moral Issues

WST intends to **vote against** proxies involving management’s actions relative to social or moral issues. Where the economic impact of a proposal is not clear, a vote to “abstain” may be appropriate.

Guidelines: Foreign Investments

On occasion, WST may invest client assets in foreign securities. Given the complexity and variety of regulatory schemes and corporate practices in foreign countries and other factors such as translation expenses, there may be excessive costs associated with voting proxies for foreign securities. Thus, WST intends to **abstain from voting** such proxies.

Guidelines: Client Guidelines

A client may have their own set of proxy voting guidelines, which may conflict with WST’s policy or with the voting guidelines of another client. If such a situation arises, it is the intention of WST to comply with client guidelines by voting the proxies attributable to that client on a proportionate basis (based on the number of shares held by the client).

Conflicts of Interest

In the instance where WST is required to vote proxies, the voting policies and procedures are designed to ensure that proxies are properly voted, material conflicts are avoided or resolved in the best financial interest of the clients and that fiduciary obligations are fulfilled. Neither WST nor any person involved in the proxy voting process is engaged in any material business other than managing assets for clients. WST has reviewed and will continue to review with its officers and employees whether any relationships, personal, business or otherwise, exist between WST or any of its officers or employees (including their immediate families) and the issuer of any of WST’s client holdings or any of the issuer’s officers, directors, director-candidates, or proxy proponents.

WST recognizes that it is affiliated with other companies through its association with Rosemont Partners, LLC. However, neither WST nor any of its employees are cognizant of the activities of such affiliates other than awareness of the general business activities of some affiliates, nor is WST subject to influence by any such affiliates in terms of voting its proxies. WST also

recognizes that it is affiliated with Lafayette Advisors, LLC; however, neither WST nor any of its employees are subject to influence by any such affiliates in terms of voting its proxies. Should any officer or employee be subject to any such influence, he/she shall immediately report such contact to the Compliance Officer.

Procedures

An administrator at WST will collect proxy material, compare the shares on the proxy against the shares in its database and cast the votes according to these policies and procedures.

WST utilizes Broadridge’s ProxyEdge software for its required proxy voting and record keeping. The online Proxy Edge system stores records of how shares were voted per account and enables WST to maintain accurate information on proxies.

This process is performed according to the predetermined guidelines stated above and all proxy information is reviewed daily. One of our administrators checks the ProxyEdge online system every day, reviews proxy meeting information, looks for discrepancies between the ProxyEdge system and our portfolio management database, confirms new and closed accounts, and reviews the meeting alerts. If any proxies need to be voted, the administrator notifies a Research Analyst to provide a voting decision.

Investment Committee Members are:

- | | | | |
|----------------------------|-----------------------|-----------------------|---------------------|
| - Wayne F. Wilbanks | - Wade A. Monroe, Jr. | - Dan Powell | - David Abrams |
| - Lawrence A. Bernert, III | - Thomas McNally | - Doug Greiner | - Dabney Treacy |
| - D.J. Kyle Elliott | - Paul Ferwerda | - Heather Randazzo | - Sarah Larkin |
| - Mark R. Warden | - Scott McCluney | - Magdalene DeGuzman | - Christian Theurer |
| - Roger H. Scheffel Jr. | - Amie Baty | - Elizabeth Marchetti | |

New accounts that require Wilbanks, Smith & Thomas to vote are reported to Broadridge who then forwards the account information to the brokerage firm or financial institution that has custody of the clients’ securities. The new accounts are entered into Proxy Edge so that subsequent meetings can be electronically voted, account holdings can be updated and any future meetings monitored through Broadridge. If a custodian rejects Broadridge’s new account information form, WST should receive paper ballots until the rejection has been researched and resolved. All paper ballots received by WST will be voted in accordance with the votes cast electronically through Broadridge, following the same voting guidelines and procedures. Copies of these ballots and accurate records of the voting will be maintained.

Proxy Voting Record Keeping

WST will maintain (i) written Proxy Voting Policies and Procedures; (ii) all Proxy Statements received in connection with client securities; (iii) a record of how WST voted each proxy; (iv) any other documents prepared by WST that were material to the voting decision or that memorialize the basis for that decision; and (v) a copy of each written client request for voting records and a copy of the written response to a client request (whether written or oral).

Client Request

Wilbanks, Smith & Thomas will send a current copy of its Proxy Voting Policies and Procedures to any client, where Wilbanks, Smith & Thomas is required or has agreed to vote proxies at their request as well as a record of previously voted proxies for their holdings by writing or calling:

Patrick D. Hayes, Chief Compliance Officer
150 West Main Street, Suite 1700
Norfolk, VA. 23510
(757) 623-3676

Requested material will be promptly forwarded to the client.

Amendments Disclaimer

WST’s Investment Committee reserves the right to modify or amend these policies and procedures at any time without notice.
